LIST OF TOLL FERRIES IN THE UNITED STATES

As of December 31, 1938 .

FEDERAL WORKS AGENCY
U.S. PUBLIC ROADS ADMINISTRATION .

(Tentative - subject to correction)

The following list of toll ferries operating in the United States as of December 31, 1938 has been compiled from the best available information. Owing to the condition of many of the records the data here presented are submitted in preliminary form only, subject to verification.

Ferries included in this report are those operating between fixed terminal points for the chief purpose of transporting motor vehicles, although they may also carry foot passengers and freight. Domestic steamship lines carrying vehicles as freight and other classes of water carriers whose operation may not be reasonably considered in the maintenance of regular service for the movement of motor vehicle traffic across a body of water are excluded.

The data are arranged in two tables. Table 1 describes the location of the facility and lists the one-way toll rates. Table 2 gives information on the service provided at individual crossings and items of ownership. The last column of this table refers to the average capacity, in number of vehicles, of boats normally assigned to a particular crossing and does not cover all vessels of the owner. The column "Number of boats owned" refers to all vessels owned irrespective of how they may be distributed among various crossings.

Ferries are listed according to their local names and by States in alphabetical order. Reference numbers are used to further identify each facility and to indicate its approximate location on the attached map of the United States.

Information covering 660 ferries is included in the tables. The ownership of these ferries was reported as follows:

Public	60
Private	600

The ferries are further classified as intrastate, interstate, or international:

Intrastate	456
Interstate	178
International	26

Since January 1, 1939, three toll ferries in Tennessee were made free. These are indicated in the tables by the symbol (#).

The operation of Dimmick's Ferry between New Jersey and Pennsylvania was discontinued in April 1939. The operation of Edmonds-Port Townsend Ferry in Washington was discontinued May 1, 1939.

In addition to the ferries listed, a "roving ferry" operates intermittently at the following four Missouri River crossings:

1. Between Vermillion, South Dakota, and Maskell, Nebraska.
2. Between Springfield, South Dakota, and Santee, Nebraska.
3. Six miles E. of Iona, South Dakota.
4. Twelve miles N.W. of Fort Thompson, South Dakota.

Persons desiring to use any of these crossings should make inquiry in advance as to the availability of ferry service. The ferry may operate at any of the four crossings at the election of the ferry owner, Mr. Tagtoe. The capacity of the boat is two vehicles. The estimated vehicle load limit is eight tons.

9/1/39

LIST OF TOLL FERRIES IN THE UNITED STATES
