

# Helping Patrons by Making Content and Services Accessible

Kelsey Flynn

Technical Information Specialist

U.S. Army Corps of Engineers – Portland District

[Kelsey.m.Flynn@usace.army.mil](mailto:Kelsey.m.Flynn@usace.army.mil)

# What we will discuss today:

- Screen readers
- Disability sensitivity
- Website design
- Accessibility aids
- Training

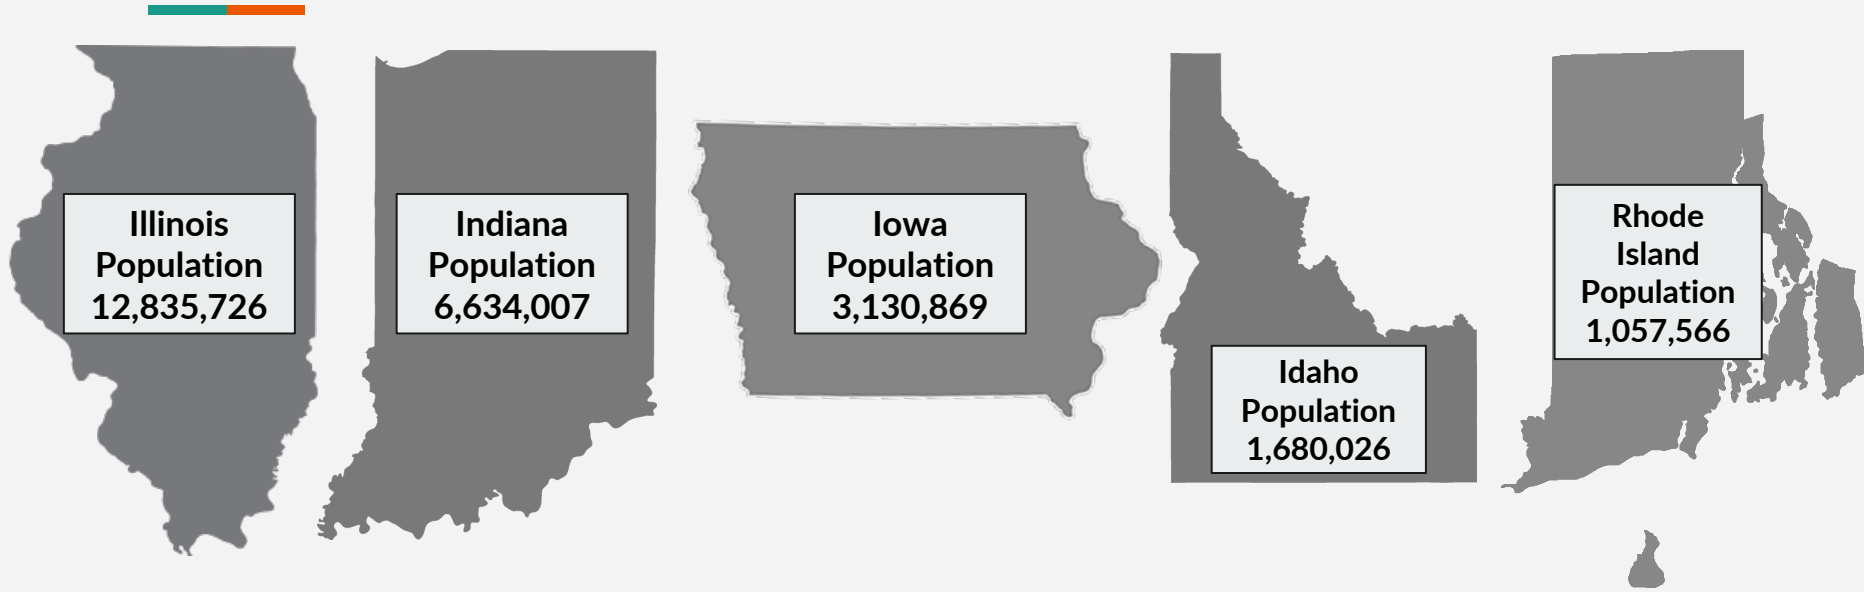

# Vision Loss

According to the 2018 National Health Interview Survey, **25.5 million** American Adults age 18 and older reported experiencing vision loss.

# 25.5 Million Americans...

**Population of all the “I” States: 25,338,194**

(United State Census Bureau, 2018)

# Sensitivity

- Treat patrons as individuals
- Remember to give clear and accurate directions
- Do not treat an adult as a child
- Always ask first if a person needs assistance
- It's okay to use the words, "*see*", "*look*" or "*read*"
- Identify yourself and others

# Language Sensitivity

## **Appropriate Terminology**

<https://www.brown.edu/campus-life/support/accessibility-services/resources-teaching-students-disabilities/appropriate-terminology>

## **National Center On Disability and Journalism**

<http://ncdj.org/style-guide/>

## **The Courtesy Rules of Blindness**

<http://www.blind.net/general-information/the-courtesy-rules-of-blindness.html>

## **The Language of Disability and Political Correctness**

<http://www.acedisability.org.au/information-for-providers/language-disability.php>

# What are screen readers?

Screen readers are software programs that allow people who are blind or have low vision to use computers. The software works by reading text displayed on the screen and converting the text to speech using a speech synthesizer or into braille using a refreshable braille display.

# Popular Screen Readers

- JAWS: Job Access With Speech
- NVDA: NonVisual Desktop Access
- VoiceOver: Apple Products
- Narrator: Microsoft Windows 10
- ChromeVox: Chromebooks

# JAWS: Job Access With Speech

***Freedom***  
***Scientific***<sup>®</sup>

**JAWS**<sup>®</sup> *for Windows*

# JAWS: Job Access With Speech

## **Platform:**

- Systems starting with Windows Vista (2006)

## **Cost:**

- \$1,285 professional license – 3 PCs

## **Internet Compatibility:**

- Mozilla Firefox
- Google Chrome
- Microsoft Edge

## **Voice Options:**

- Includes voices for over 30 different languages

# JAWS: Job Access With Speech

## Training:

- Built-in free DAISY Player and full set of DAISY-formatted basic training books
- Training videos online

## Output:

- Internal software speech synthesizer
- Refreshable braille displays

## PDF capabilities:

- Works with Adobe Reader to read PDF documents

(Freedom Scientific)

# JAWS: Job Access With Speech

---

## Advantages:

- Two annual updates
- Popular in schools and government agencies
- Network licensing option
- Free support and help

# JAWS: Job Access With Speech

---

## Disadvantages

- Initial cost
- Update cost (software maintenance agreement)
- Training is not intuitive

# JAWS: Job Access With Speech

# NVDA: NonVisual Desktop Access

**NV** Access

---

Empowering lives through  
non-visual access to technology

# NVDA: NonVisual Desktop Access

## Platform:

- Systems starting from Windows Server 2008 R2

## Cost:

- Free

## Internet Compatibility:

- Mozilla Firefox
- Google Chrome
- Microsoft Edge

## Voice Options:

- Includes voices for over 50 different languages

# NVDA: NonVisual Desktop Access

## Training:

- Free user guide
- Training videos online
- Training ebooks and audiobooks for sale
  - Ebook: \$25.00
  - Audiobook: \$35.00
  - Braille Book: \$50.00

## Output:

- Internal software speech synthesizer
- Refreshable braille displays

## PDF capabilities:

- Works with Adobe Reader to read PDF documents

(NVAccess)

# NVDA: NonVisual Desktop Access

---

## Advantages:

- Free!!
- Community run email list
- Open-source software
- Constant updates
- Intuitive learning experience
- Portable on a flash drive

# NVDA: NonVisual Desktop Access

---

## Disadvantages:

- Telephone support
- Something new to learn
- Different voices cost more

# NVDA: NonVisual Desktop Access

---

- Hotkeys and Commands
- Windows Basics
- Using the Internet
- Using Google Docs and Drive

# VoiceOver: Apple Products

# VoiceOver: Apple Products

## Platform:

- Systems starting with Mac OS X 10.4 (2005)

## Cost:

- Mac computer (\$1,000 - \$2,000)

## Internet Compatibility:

- Safari
- Google Chrome
- Mozilla Firefox

## Voice Options:

- Includes voices for over 35 different languages

(Apple Accessibility, 2019)

# VoiceOver: Apple Products

## Training:

- Free online user guide

## Output:

- Internal software speech synthesizer
- Refreshable braille displays

## PDF capabilities:

- Able to read PDFs

# VoiceOver: Apple Products

## Advantages:

- Integrated into all “built-in-apps”
- Apple Accessibility team
- Stable and predictable
- Many voice options
- Accessibility package

# VoiceOver: Apple Products

## Disadvantages:

- Only available on Apple products
- Updates only with system updates
- Not portable

# VoiceOver: Apple Products

- VoiceOver Quick Start Guide
- Hadley Instructional Videos: VoiceOver

<https://www.hadley.edu/InstructionalVideos/>

# Narrator: Windows

Microsoft

# Narrator: Windows

## Platform:

- Windows 10 & 11

## Cost:

- Windows computer (\$300 - \$1,500)

## Internet Compatibility:

- Microsoft Edge

## Voice Options:

- Includes voices for over 40 different languages

(Microsoft: Windows Support)

# Narrator: Windows

## Training:

- Free guide to Narrator

## Output:

- Internal software speech synthesizer
- Refreshable braille displays

## PDF capabilities:

- Not able to read PDFs

# Narrator: Windows

## Advantages

- Works well with Windows Desktop
- Easily update Windows
- Feedback Hub
- Steady improvement

# Narrator: Windows

## Disadvantages

- Less-than-intuitive keystrokes
- Lack of usability on wide range of websites
- Lack of video tutorials
- Difficulties using Chrome or Firefox

# ChromeVox: Chromebooks

chrome

# ChromeVox: Chromebooks

## Platform:

- Chromebook running on Chrome OS 56 or above

## Cost:

- Chromebook (\$250 - \$1,000)

## Internet Compatibility:

- Google Chrome

## Voice Options:

- Includes voices for 38 different languages

(ChromeVox User Guide)

# ChromeVox: Chromebooks

## Training:

- Free guide to ChromeVox
- Training videos online

## Output:

- Internal software speech synthesizer
- Refreshable braille displays

## PDF capabilities:

- Not able to read PDFs

# ChromeVox: Chromebooks

## Advantages

- Great training videos online
- Has improved greatly
- ChromeVox-Discuss
- ChromeVox Feedback

# ChromeVox: Chromebooks

## Disadvantages

- Still working through some bugs
- Something new to learn
- Not able to read PDFs

# ChromeVox: Chromebooks

# Other tips and tricks

- All computers or as many as possible
- Multiple screen readers
- Headphones
- Patron preference
- Keyboard navigation
- Practice beforehand

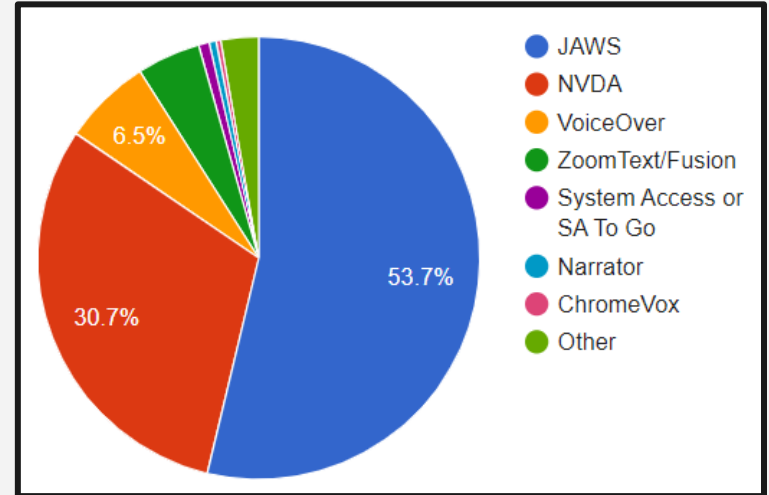

# WebAIM: Web Accessibility in Mind

# WebAIM Screen Reader User Survey

Which of the following is your primary desktop/laptop screen reader?

Response	# of respondents	% of respondents
JAWS	832	53.7%
NVDA	476	30.7%
VoiceOver	100	6.5%
ZoomText/Fusion	72	4.7%
System Access or System Access to Go	12	0.8%
Narrator	8	0.5%
ChromeVox	5	0.3%
Other	43	2.8%

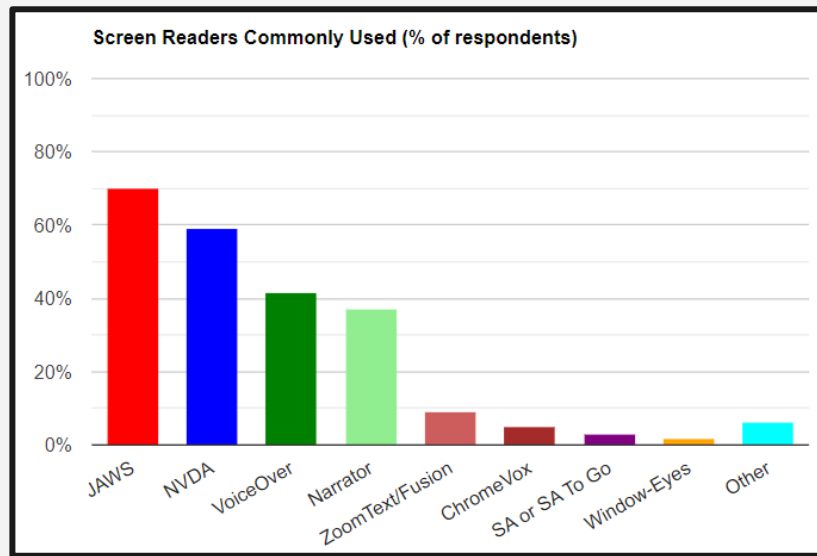

# WebAIM Screen Reader User Survey

Which of the following desktop/laptop screen readers do you commonly use?

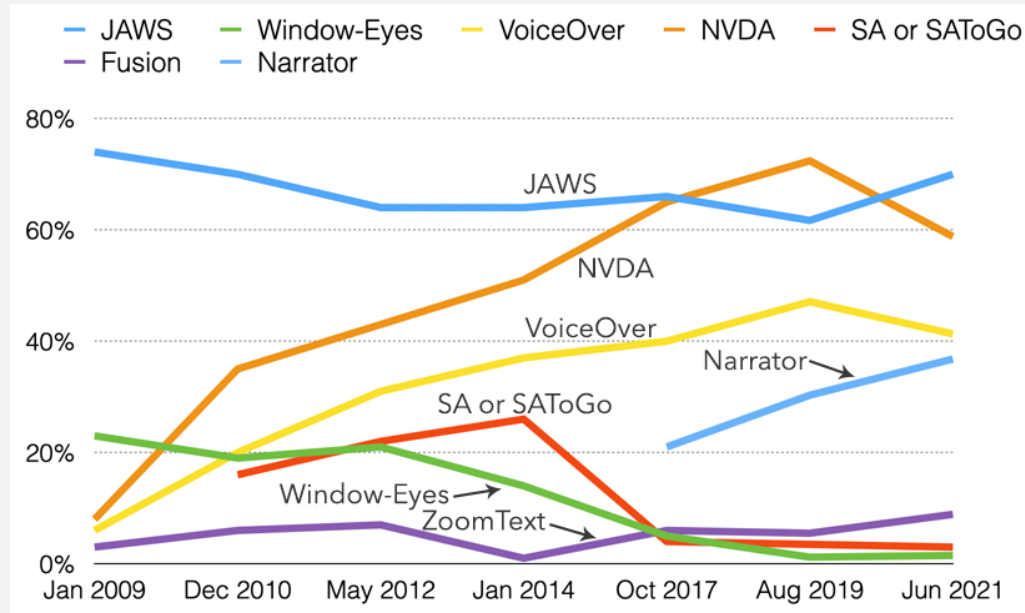

Response	# of respondents	% of respondents
JAWS	1097	70.0%
NVDA	922	58.8%
VoiceOver	648	41.3%
Narrator	577	36.8%
ZoomText	140	8.9%
ChromeVox	73	4.7%
System Access or System Access to Go	47	3.0%
Window-Eyes	24	1.5%
Other	99	6.3%

(WebAIM: Web Accessibility in Mind, 2021)

# WebAIM Screen Reader User Survey

## Historical trends for primary screen reader usage

(WebAIM: Web Accessibility in Mind, 2021)

# WebAIM Screen Reader User Survey

When using your primary screen reader, which browser do you use most often?

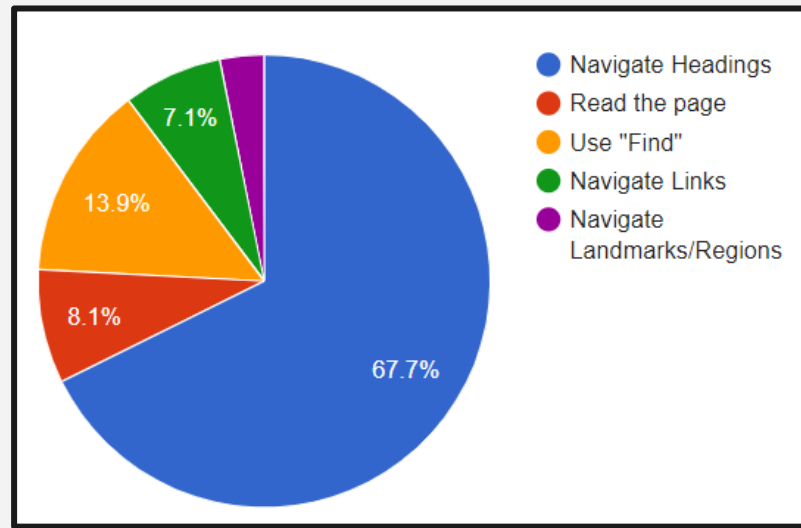

Response	# of respondents	% of respondents
Chrome	833	53.6%
Microsoft Edge	286	18.4%
Firefox	257	16.5%
Safari	79	5.1%
Internet Explorer	52	3.3%
Other	47	3.0%

# WebAIM Screen Reader User Survey

When trying to find information on a lengthy web page, which of the following are you most likely to do first?

Response	# of respondents	% of respondents
Navigate through the headings on the page	1047	67.7%
Read through the page	126	8.1%
Use the Find feature	215	13.9%
Navigate through the links of the page	110	7.1%
Navigate through the landmarks/regions of the page	49	3.2%

# WebAIM Screen Reader User Survey

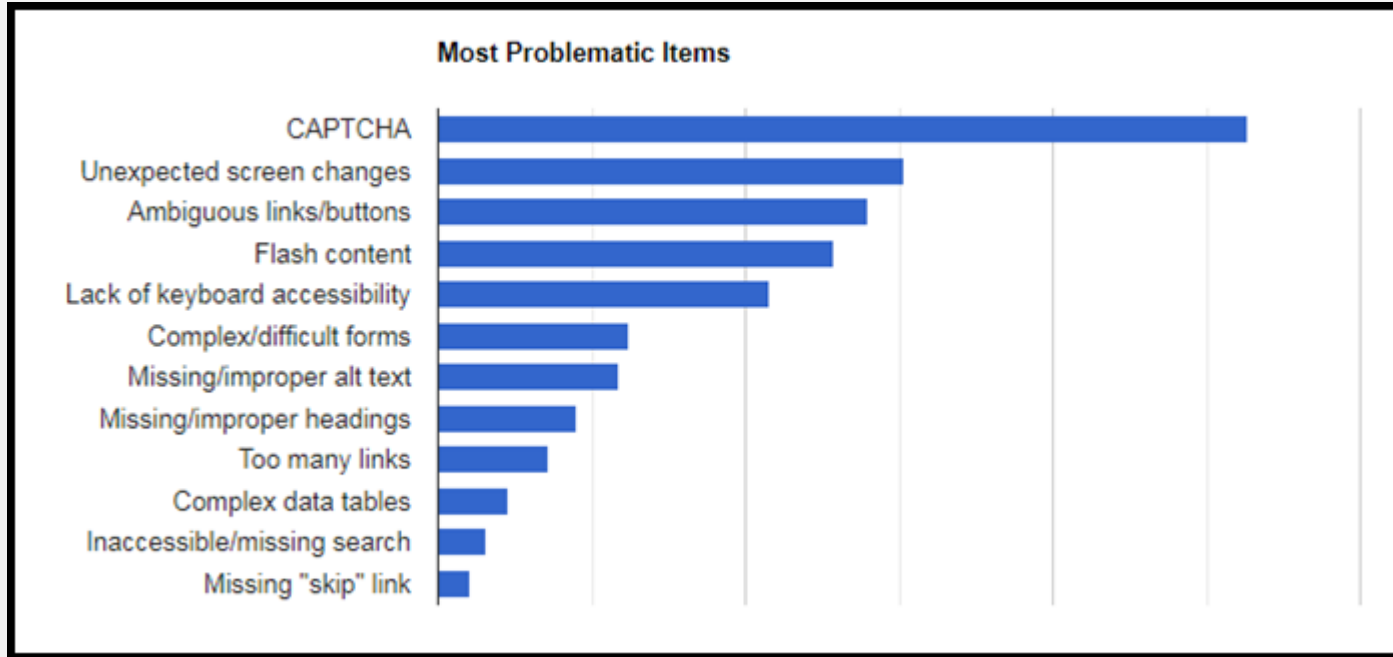

Which document format do you find most accessible?

Response	# of respondents	% of respondents
Word	1036	68.9%
PDF	194	12.9%
EPUB	160	10.6%
Other	113	7.5%

(WebAIM: Web Accessibility in Mind, 2021)

# WebAIM Screen Reader User Survey

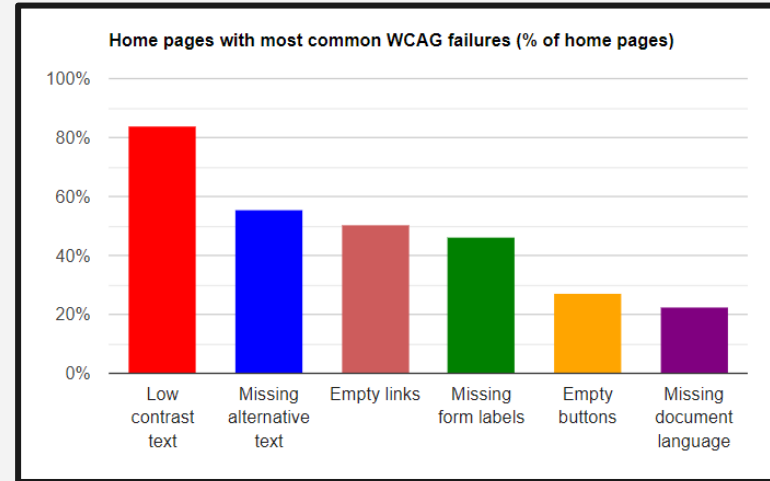

(WebAIM: Web Accessibility in Mind, 2017)

# The WebAIM Million

## Home pages with most common WCAG 2 failures

WCAG Failure Type	% of home pages in 2022	% of home pages in 2021	% of home pages in 2020
Low contrast text	83.9%	86.4%	86.3%
Missing alternative text for images	55.4%	60.6%	66.0%
Empty links	50.1%	51.3%	59.9%
Missing form input labels	46.1%	54.4%	53.8%
Empty buttons	27.2%	26.9%	28.7%
Missing document language	22.3%	28.9%	28.0%

**\*96.5% of all errors detected fall into these six categories.**

# The WebAIM Million

- **Across the one million home pages, 50,829,406 distinct accessibility errors were detected—an average of 50.8 errors per page.** The number of detected errors decreased by 1.1% since the February 2021 (51.4 errors/page) analysis. "Errors" are WAVE-detected accessibility barriers having notable end user impact, and which have a very high likelihood of being WCAG 2 Level A/AA conformance failures.
- **Home page complexity increased significantly in 12 months,** from an average of 887 elements in February 2021 to 955 elements per home page in February 2022 - a 7.7% increase.
