STATEMENT OF SECRETARY OF TRANSPORTATION BROCK ADAMS ON AIR
REGULATORY REFORM BILL, May 9, 1978

"Today's action on the air regulatory reform bill by the House Subcommittee on Aviation is a significant victory for airline passengers and a major move toward low-cost air transportation.

That's what President Carter and I have been fighting for during the past year. We will continue to work with the full House Committee and later with both House and Senate to achieve the strongest possible aviation regulatory reform bill."
