Leveraging Technical Expertise via Boeing Library Services*

The Boeing Library is now improving access to external and internal technical information via:

- The Library Catalog
- Customized Webpages
- Special Collections Experts

This helps groups leverage expertise across the enterprise.

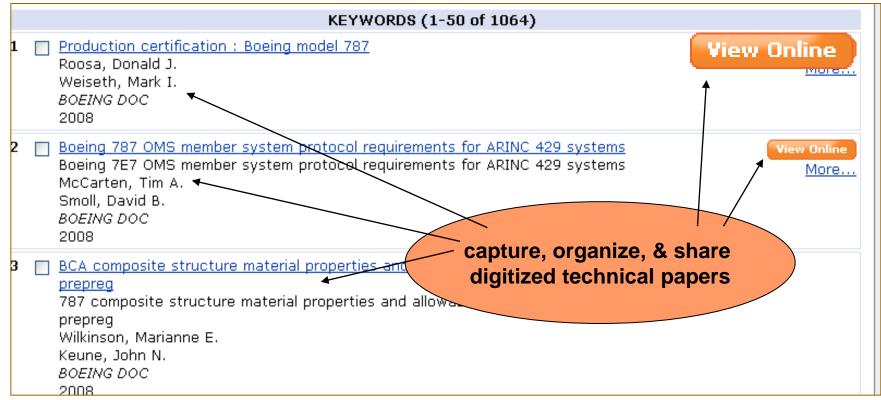

*Boeing retains all rights to the material presented

Boeing Library Catalog

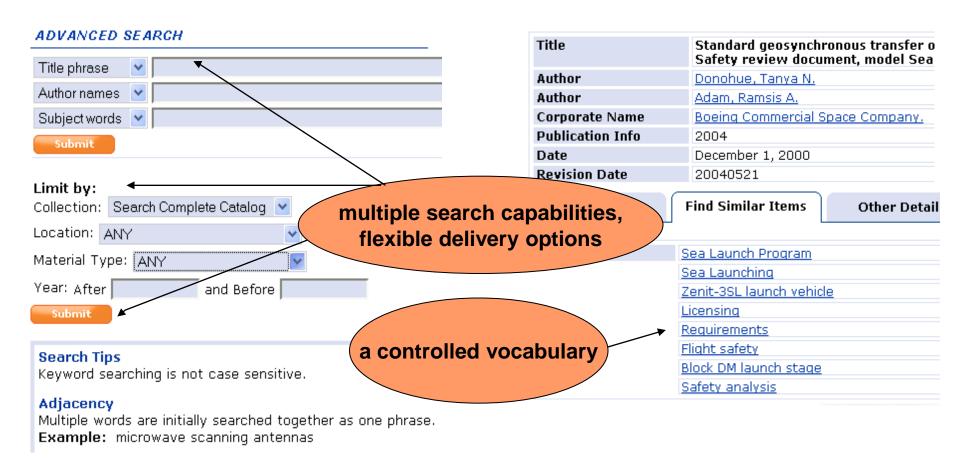

affordable platform

- within the firewall
- access across the enterprise or by a selected audience

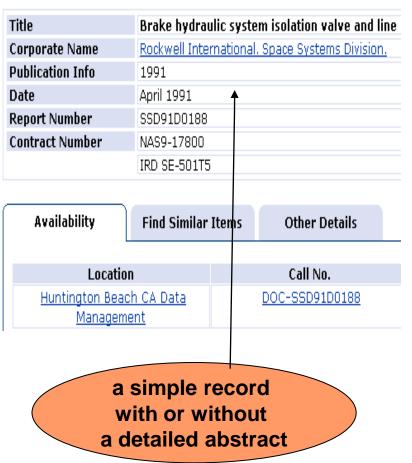

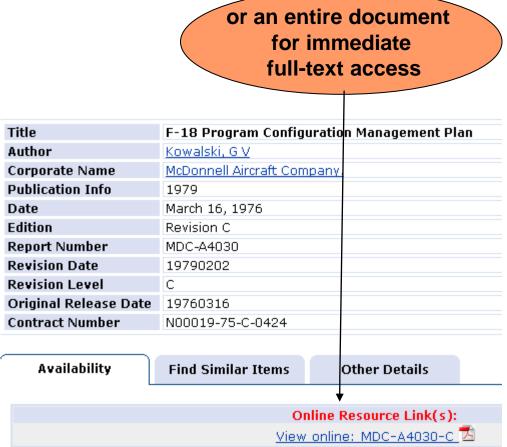

Boeing Library Catalog

Boeing Library Catalog

Boeing Library Catalog access to Boeing access to external content technical expertise such as AIAA, IEEE, ACM, Knovel and NAFEMS. BOEING DOCUMENT SEARCH Resource Name AIAA Electronic Library [e/ectronic resource] Alternate Resource Name | AIAA Meeting Papers Keywords root cause analysis AIAA Journals American Institute of Aeronautics and Astrona Limit by: AIAA Collection: Search Complete Catalog > Resource Type E-JOURNAL (full text) AIAA Electronic Library [electronic resourc Year: Online Resource Link: After (yyyy) Before (yyyy) Sort by: Number Resource Name NAFEMS library [electronic resource] National Agency/for Finite Element Method Alternate Resource Name For the purpose of the Boeing Library Catalog, Boeing documents are D-documents, T-documents, some Resource Type E-REPORT (full/text) S-documents, manufacturing development reports (MDR), and many of the released reports of the heritage Description NAFEMS, the International Association for Rockwell and heritage McDonnell Douglas sites. Boeing documents do not include nonreleased reports, work Community, provides a library of independe papers, books, annual reports, photos, web sites, video recordings, or audio recordings, even if they are pr simulation. Publication topics include simulation. by Boeing. (FEA), multibody system (MBS) dynamics, search via keywords, titles or authors with For an Identification Number search, type the Boeing document number as it appears. Punctuation and spar resources, please see the NAFEMS datewa may be omitted (Example: D6-76300)

Customized Webpages – by subject

Gateway Webpages that present information resources on a particular topic bridge the gap between knowledge management and library resources.

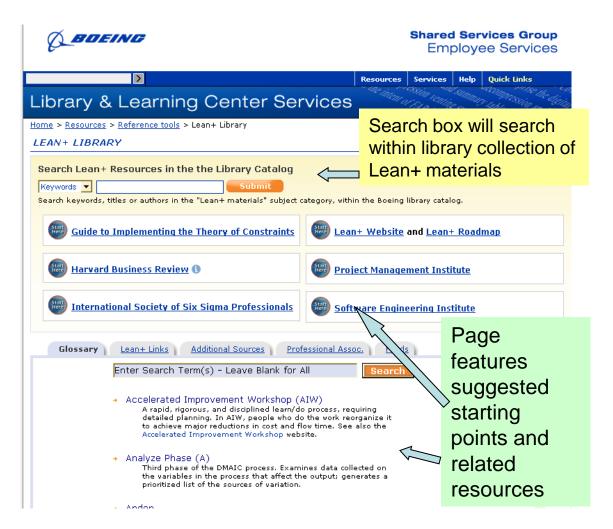

These pages can facilitate quick access to external and internal technical expertise as well as connections across business units.

Based on the sensitivity of your information — whether it is proprietary, export controlled, or requires an access control list — the Boeing library can protect it from unauthorized individuals using one or more levels of security restriction.

Gateway Webpages present information resources on a particular topic, bridging the gap between knowledge management and library resources.

Gateway pages can be created to pull together resources on a topic of interest, e.g. Lean+

These pages can facilitate quick access to external and internal technical expertise as well as connections across business units.

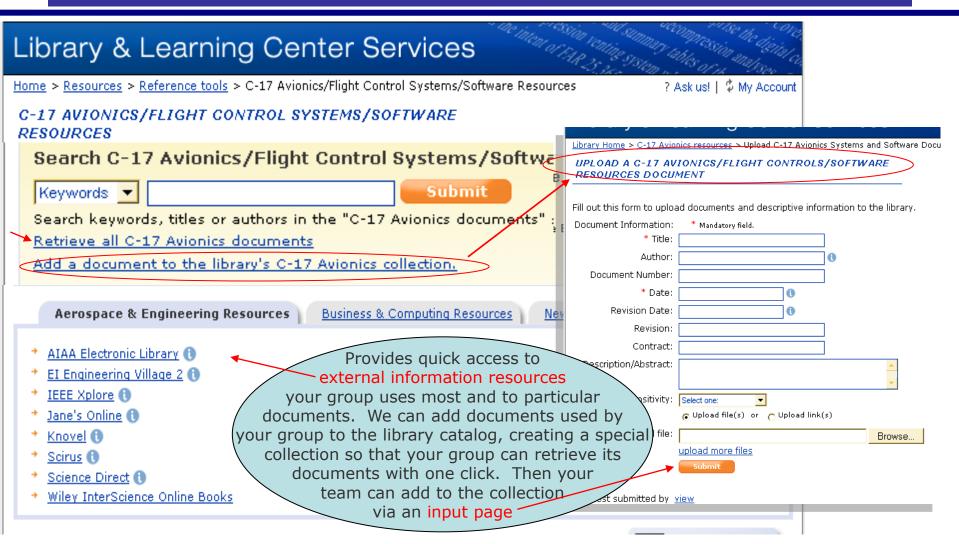

Customized Webpages - for a work group

Gateway Webpages can be customized to your group's knowledge and content specifications.

Librarians can set up the webpage to provide quick access to the external information databases and subscriptions that your group uses most, and also to particular documents.

The library staff can add the documents used by your group to the library catalog, creating special collections within our Library system where your material can be accessed by your team from this page with one click.

Gateway Webpages can be customized to your group's knowledge, content and security specifications.

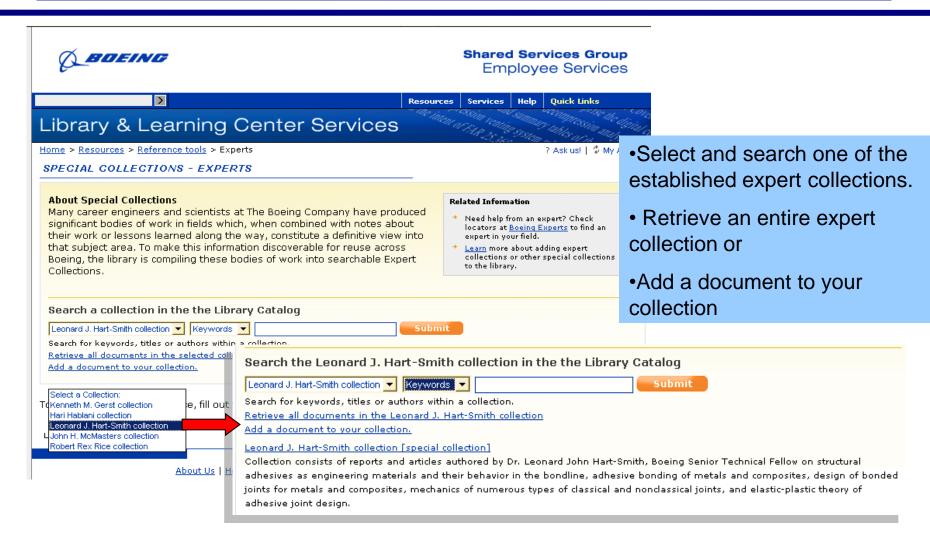

Special Collections – Experts

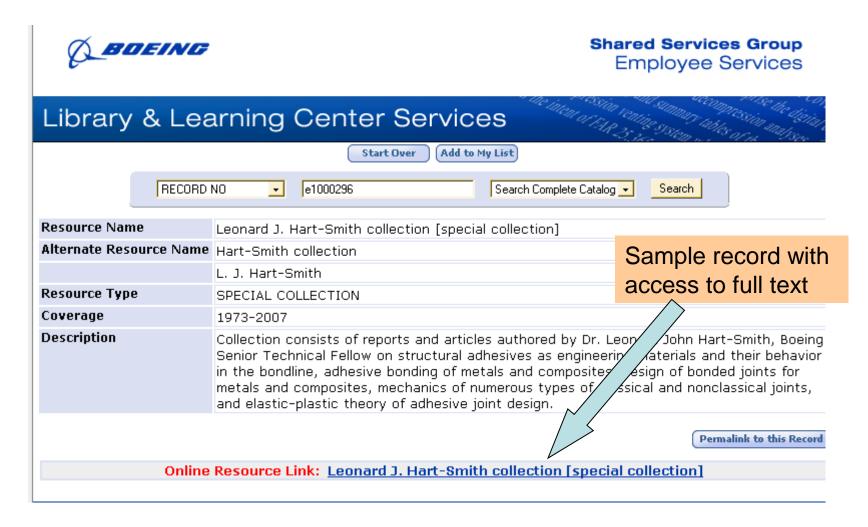

Career engineers and scientists at The Boeing Company have produced significant bodies of work in fields which, when combined with notes about their work or lessons learned, constitute a definitive view into that subject area.

To make this information permanently discoverable for reuse across Boeing, the library is compiling these bodies of work into searchable special expert collections.

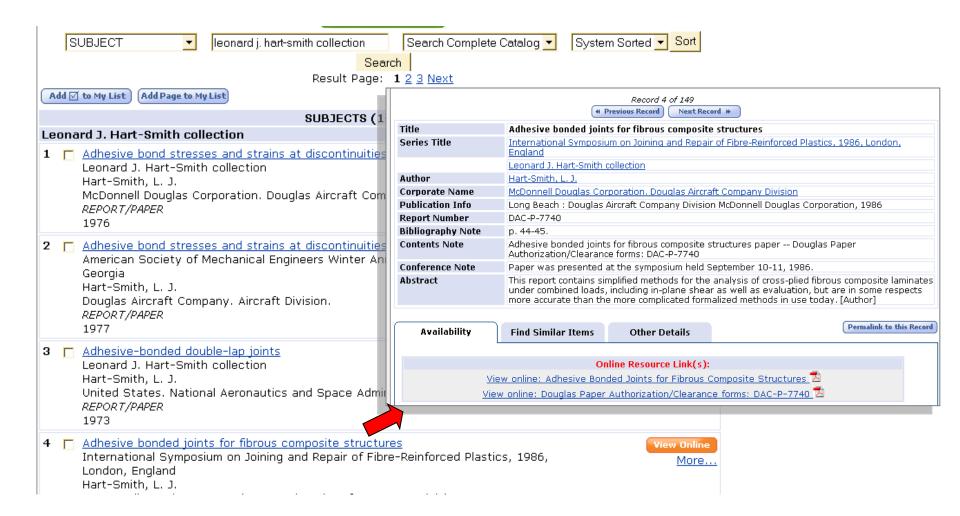

Special Collections - Experts

Special Collections - Experts

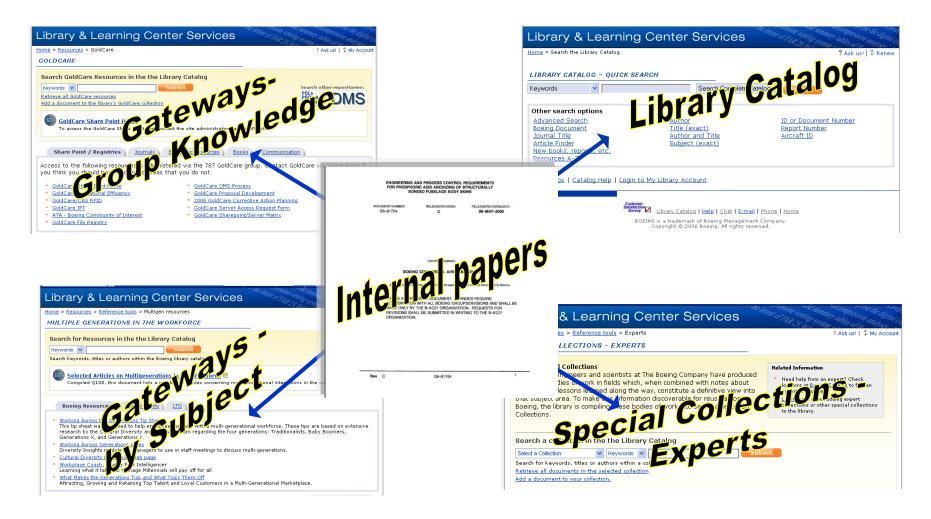

Special Collections - Experts

Further advantage:

Each technical paper can be searched via multiple access points

Leveraging Technical Expertise:

Revealing and connecting Boeing authors with similar interests and similar projects across the enterprise
