The Architectural Department feels the loss of Lose Miller, whose resignation became effective Earch 71st. Reliable sources say he is leaving for the States.

After a month or more of field tripping, Ed Seller and Ted Strandberg came back with a "Mian' Reach" tan. We are all wondering whether they gained that in Alasks or Florida. After all, they had enough time to no down to the cunny south.

The other day Bermute came to work with a fur bow tie. A fer days later Rilpatric found a black fur cap on the shelf and ushow Barmute of other his big grow o "little".

Last month we reported that Leo Wilder was "hoping" for twin boys. This issue of Eublid finds him still "hoping".

"J. Paulie Jones" sold out all available minutes on his minute ice pool wheel. Aryone the was willing to shoot double or nothing had the boner to put their on name on the time!; some won, in fact most ausbewers wen. I guess that will beach Paulie not to manble with lucky Canters.

Same of the bows some back to the office very lame from outling brush for a survey of the analogue. Localize Site. We have bett furning very his ow roust as a slift to project him from the "elements" ????? Loffice out brush in his shirt all you and here it all that a pant

COMMUNICATIONS COMMUNIQUE

Most of you doubtless remember the department, "A Gaze into the Communications Branch Crystal Bull", which made a final appearance in the May 1914, issue of the Mukluk Telegraph. Its continued absence can be explained only by the fact that the man who scanned the ball so hopefully for so many years went "upstairs" to bigger and better things-and carried the ball to his new and more sacred sanctum. Another transparent sollere in which the future may be develored with any reasonable degree of accurucy has not yet been located. The ouija board donated by a well-wisher has long since been given the deep six. It couldn't even pich the month during which the ice was to break up at Henana.

In the absence of a suitable device to assist us in meeting exigencies and anticipating contingencies, we are forced to rely on what we read in the papers. There recently came to our heads an interesting and most encourag-

WOODY ISLAND WILLIES April 11, 1945

The Banana Belt (this right little, tight little island--and you know what we mean by tight--of Woody) is recuperating from the shock of a five inch snow and sub-freezing temperatures. As Comrade Reukauf, our electrical wizard, remarked, "You wouldn't believe it could get this cold in Alaska."

Official ice testers "Mack" Manring and F. Eisinger, who recently made the weight, strode bravely out on the lake below our little plantation yesterday AMI. Both being stocky sons of the CaA and very good at social ice breaking in the states, their report that the lake was not fit for contact skating was taken seriously by other communicators and the Modiah beaver who lives in our lake had things pretty much to himself.

Now that we've written all the WX specials off the books, let's go into the field of transportation. The CAA has inherited from the Army a command

TWSIDE GAHRELL

"You men can't keep me in this house" forever, cooking, cooking, cooking day in and day out," declared hirs. A. G. Spencer to her husband RES Al Spencer and their star boarder accom Rosie Roseneau recently.

"One of these days you'll wake up and find me gone," she continued. "I'm goin! to pack up some grub and go hikin' away off on this island somewhere and just enjoy nature and think and write lyrics."

Cries of protest from Al and Rosie were silenced by wide-open-spaces-loving Mrs. Spencer with the injunction, "You two are getting too fat anyway. It will be good for you to do your own cooking for awhile."

Spencer and Roseneau have conferred with Commissioner Frank Daucherty as to whether there is somewhere in the territorial or federal statutes a clause prohibiting this disconcerting neglect of the maintenance supervisory and aircraft communicatory stomachs, but to date little hope is seen for the pair and emergency stores of corned boof and soda orackers are being laid in.

LIFE OF RILEY AT MR. 2 HOUSE

Not so bleak is the outlook of weathermen Barney Barnhart and "WAO" Grimes, the only other bachelors of the Cambell colony. After three years of "midratch men cooks suppor" routine with periodical aid only in dishwashing and cleaning from the local belles, backelor bungalow

"DON'T FENCE ME IN," PLEAD'S HOUSEAINE | has found an Eskino maid who knows the recine bool backwards and does something bomt it. Six dars a week supper is ready right on time, and what suppers they are ! The early days, once praised as an easy life, are shudderingly recollected as a nightnare of endless drudgery by these fortunate gentlemen who now have time to devote their attention to larger and higher things.

> "Itte wonderful." said Barnhart. "One merely rolls out of bed and onto the supper table, picks up a fork and niles in."

> Grimes, however, voiced a warning to the thousands of harassed Weather Bureau employees whose applications for transfer to Gambell he expects to pour in on publication of this article.

> "Rumor has it," asserted Grimes, noted locally for his uncanny knowledge of all current affairs of the heart within a radius of 200 miles, "that our maid is contemplating patrimony in the not too distant future. Naturally we are heartbroken over the prospect, and as for me. I hope to be trunsferred before that dreadful day."

PIBAL PETRIFIES PERSONNEL

"Life is not all a bed of roses at Gambell." moaned Barney Barnhart, known to his intimates as The Pago Pago Mid (pronounced Pongo Pongo). "There are different ominions about the desirability of staying here or not staying here,

(Continued on page 14)

Don't know where all the people in all the stations find all the things to write about that they do, but if they | put us through all our tricks (or ruther, can do it, we can too, so here roes. Course, this writing business is a little out of our line - or is it just that : up one of his all-time famous Italian we are a little stale at it?

First off, ruess we'd better rive you an insight on the personnel at JS. Can't hold a candle to the "Little People at McGrath, but do our share with eitht CAA sprouts, with immediate prospects of another. CAC "Larry" Lawton, temporary bachelor, and ace high poter player, R'S "Joe" Ross, SGM Newell "Bruce" Tribb, and Accoms Ed and Del McDade and Mard and Florence Thompson. That teles in all at the present timo, but we are patiently (?) availing the arrival of another Accom from JE. Here's hoping he's not delayed in transit (we know 10).

Can't met used to the peace and quiet around here the past week, but haven't had any traveling personnel here in that time, and it's a little hard to get used to - especially since, between the traveling "city slicker" personnel and the local card sharks, the poor CAA crew have been donating on the average of once a week all winter. Oh well, next year will be different!! Anyhoo, we'll get a rest for a while, as gardening will be the spare-time-user from new until fall (if it ever quits snowing in these parts).

Imagine Larry's chagrin when, after trying to get a moose all season, he meanders down to his garden spot, and lo !--moose hair on the fence. But, the meeso" up this way are plenty smart. They know the station and CAA site are on the reserve, so they calmly saunter round and about, using the landing strip as their personal highway, knowing darn well we can't do s thing about it. In fact, it's a standard phrase here, when an aircraft asks landing instructions, to udvise "Only reported traffic is a acose in center of landing strip. Caution advised," or equivalent thereof! Chompsons got close to gotting a moose this year -- at least they had the license.

Had Inspector Gene Derato have the latter part of January, and of course he his tricks), but we managed to not even with him. Finally persueded him to cool; spanhetti feeds and oh boy, was it rood! Then had him over for dinner the next night and fed him his own spacketti again. That's really drawing the line pretty tight, but he must have enjoyed it, as he faithfully promised to pay us another visit in June or July.

Ed l'eDode spends all his spare moments on a skiff and dory which he purchased recently. His ambition is to take a trip to MQ this summer via the water route. Anyhow, his energies are not being rasted, as he has been officially designated "Kenai Port Commissioner". Perchance he can get a contract to tronsport our downissary sumplies this soring. Always rainteined the "Resilof" needed a little competition on the 19-JS run.

There have been numerous contents remarding trainees, some for favorable. some Countful, and some downright apparonistic, but then there are, on the other hand, some purty good stories connected with em. too. I think the best one was recarding the new trainee, fresh out of school, who, upon arriving at her station, was put on the midwatch the first night at the station - and alone. Mondless to say, her heart was just more than in her mouth. The CAC reassured her by saving if there were any doubts about anything, to give him a fingle on the phone - he was a light sleeper and would come to her aid immediately. Well, leng towards morning, some wise pilot called and, upon hearing an unknown feminine voice unsweriar him, decided to have a little fun, so proceeded to ask her which was the river ran. How this little ral hadn't had a churne to see the river, much less know its course socco - by the time she collected hers. If, the plane had landed. Of course she had called the CAC - and called and called and called, but no response.

(Continued on mage 4)

KP - KOZY KORNER Otherwise Known as Scavenger Beach (here Debris Meets the Sea) .pril 23, 1945

Every three months or so, someone in camp goes enough energy to think of a ner title for our column and rushes over to the type riter to see how it looks in print. Then after seeing how terrible it does look will try to finish the column with a few items to take up your

The local "WALIS" got into print in the Fairbanks "Hows-Miner" when reporter Ferre Parker came to Kotzelus for a day to spend two weeks. She gathered enough news in town to keep Tundre Topics "hotzebue Konscious" for some time to come. She was aspecially impressed by the "WAMS", our society which meets every Jefnesday afternoon -- women only. It all began about eight months are when the wives decided to devote one afternoon a reak to do the neclected mending. Each lednesday afternoon they meet for a few hours of saving and conversation. have never abtended one of these meetincs so can't tell about the conversation. The meeting is closed after a demi-tasse served by the hostess. The highlight of these meetings is that it gives the gals a chance to dress up or wear a new "hair-do". In case all this isn't clear, "h/MAS" moons dednesday Afternoon Honders.

The Notzebue Theater has opened again after being closed for about nine months. Some time last July everyone was sested! on the hard board benches with a pair of knees in his back, watching Ponayo eat his spinach, when - puff - a cloud of black make poured out of the projector. Some dishards sat tight with purfect confidence in the operator's ability to out things right. Later in the winter an attempt was made to but the movies on a regular basis again, when nearly everyone was cassed by the fines of an engine left running in a shed next door. Butorce again all is well and the Eskimo wide come knocking at our doors on Saturday afternoon to announce that there "ill be "show tonight --- cowbour."

Our CLC Schaofor and VB Observer Hunmela, next door neighbors, are rival medel airplano buildors. What the boys won't resert to, to ward off that old I "those men" we may try it again.

demon R -- , new, cabin fever. Fritz has also cleverly mastered the art of butting complete miniature ships in bottles. What else could you do with the empties?

These "sunmy" days find the Wooys dirring for their boot. It's a good six feet under, but they'll have it dur out before breshup. Ten, Ann, and young Butch Nummela have built a real icloo. Even the Eslimos are mustified by it.

McGoven, IR OIC, came home from the hospital after a two month bout with pneumonia. Lis blood pressure and temperature are below normal, but we figure his "do-point" is obay.

If the spring breekun depends on the thic mess of the ice, we won't have any till the middle of next surner. Just asl: a counte of the fellows who due three holes, only to find gravel. The last hole was at least 500 wards offshore. The boys due down exactly 5 feet 3 13/15 inches to find two inches of water. Result, no fish.

The Saturday night dances at the village schoolhouse are being well attended. If any of you want to see a real Eskimo. dance, this is the place. You can see every dence from the Thale Dance to the Spanish Fandanco, including a Strauss Waltz. Best floor show in torm.

This about wirds un things and hone to see you again in the next issue.

King Peter

KEET EYE KIAH (Continued from page 3)

well, when the CAC came in bright and fresh along about 3 At, he received the pent up fury of hor grath and then some. We just couldn't understand it -- he was a light sleeper and had not heard the phone. Ameray, it was eventually straightened out and all was necesful. Imagine then, sometime later, the little trainee learned that the receiver must be on the hook when ringing ! (P. S. Did the CAC rugz hor? -- Not much 1)

So much for not. If this masses

ZZZ SITTINSLOKE Enny Ominus (Continued from April Mukluk Telegraph)

"Bring your radio along with you," Spitzensplutter tells him, "so's we can keep track a you."

"Roger," th' pilot says. Then fer about a hour they don't hear no more. ! Finally th! guy comes in agin.

"Listen, sweetheart," he says, 'cause ; Iwanna has thi phone agin. "Thi gink with the dor sled is a crazy ol prospecter who's allus wanted a plane. An' listen, darling, he give me th' dogs an' a big sack a gold fer that ol' wreck. He's in her now flyin' like mad. makin' motor noise through his lius, an' coin' nowheres fast. I strung my antennas along th' dogs tails an' I'm headin' straight for you, honey. Gimme continus rance. Soon as I git there we'll git married an' then we'll....."

They aint no use repeatin' all they said. Before they was through talking t' each other they had built theirselves a home in Uncle Sugar an' put both th' kids through high school. They might a finished th' kids education 'cept Spitzensplutter hands Iwanna a message he's jist copied from th' CEHO concernin' unauthorized remarks bein' made on th' range.

Well, it's dark when me an' Annie takes over th' evenin' watch. Spitzensplutter says th' guy's built hisself a igloo an' holed in fer the night. We dont hear nothin' from him. I told Sleepy about it when he come on at midnight, but I'll bet he don't remember nothin' about it when he reads this in Muktol -- if he ever stuys awake long a nuff t' road it.

Next mornin' after th' day watch takes over, things starts happenin' agin. Th' pilot calls t' say his dogs is botherin' him. Coitzonsplutter says ho oughta take his sox off an' give em more room, but he says it's really his dons that's causin' th' trouble. Seams he was afraid .t' take any a his grub off th' plane for fear th' prospector would change his mind about buyin the wreck

You can almost hear th' guy rollin' | an' want his rold back; but th' ol' codger aint bashful about keepin' his hunk a salt side an' his can a port an' beans Him an' th' dogs is both hungry. Ivanna tells him she'll have coffee an' sanwitches on when he shows up, an' that makes him feel better. Spitzensolutter saws its a cinch they aint neither of em lost any love in their sleep. Their conversation is plumb lousy with sweethearts, honeys, darlin's an!

> Th' mornin' goes purty quiet. Th' pilot calls ever ten minutes er so, jist t' tell Iwanna he's still alive, an' she calls him between times t' verify his statements. That makes th' chatter next t' continus.

Blinderna's still a watchin' it snow.

Along about noon thews a change.

"Thi does has quit." the pilot seys. "They's gone on a sit down strike. They aint movin' 'til I feed 'em. I'd walk in an lat em starve, but th' snow's too deep, an' I'm hungry as a wolf myself. Can "ou send us somethin! t' eat?"

"Tell him yes," Spitzensplutter says.

Iranna is all messed up. Her yes don't sound convincin'. "How?" she asks Spitzensplutter.

He don't answer. He's one a these guys that's full a ideas. He's got more answers to a question than the office has reasons why you can't leave Alaska when your time is up. He's been sittin' there listenin' t' a couple a trainces ditty dum dum ditty theirselves into a state a nervous presperation an' a watch in' a bunch sea gulls jist outside arguin' about roin' South. Don't ask me how he knows they is arguin' an what about. Ho's a old old hand at this code mame an' he mithte been readin' their tooth clicks for all I know. I aint arguin' how he knew. The fact is he an Blindorna rounds up a mass a frozen fish. ties one to the lag a each spagull and then shoo's th' flock off.

(Continued on page 7)

If this little saga has any moral or lesson or any bearing on conditions as they are it is purely coincidental. If one could establish any motive for this atrocity it would be undoubtedly a warning against reading E. A. Poe during daylight hours or at night.

Thile reclining one midnight dream, or one dreamy midnight as you may wish, a horrible thought came to me. It was such a thought that one might have in the twilight between sleep and wakefulness. A horrible presentment of thin s to come seemed to permeate my room and rustle among the dusty curtains which had so long festooned the sooty windows. Herein the realities of a war torn world intertwine with the sad spirits of the half world such as might be produced in the mind of an opium eater if the capricious fates reversed the effects of that marical drug. In the midst of this half-dream the apparition made his ghastly appearance. The awful mien of this -- this monster was difficult to describe. Its checks were sunion as is the case with all chastly apparitions and his -- or rather its, for such creatures can have no sex (surely) -- its lips (ah horrible horrid dream) were eternally pursed to reveal dry fangs such as protrude from shulls long exposed in ancient wolf invaced graves. Its vestures were, as is the case with all apparitions, long and black with mold and putrafaction in all of the numerous wrinkles and folds.

In the low arched doorway it stood when I seemed to start to consciousness of its presence. Then the creature of the regions of darkness laurhed, if such a thing can be said to lauch. The lauchter "had the qualities of the howl of the were wolf and the scream of the banshee combined with the death or of the lobe and the song of the dwing swan. Then that ecsence of putrescence began to speak, if such a hollow whistlin- sound can be said to be speech. I quote from memory. If my quotation is not an exact reproduction of the speech as it came to me that dismal night (and twas indeed a night quite unfit for ravens) I must be forgiven as obviously it is a great effort to force one's thoughts back to such an auful scene. It is for the edification of my fellow man only that I make this supreme effort which will most certainly take years from my life. I begin my relation with the hope, aye, the prayor, that my readers will not be affected, and I use the word affected in its broadest sense, by this story in the manner in which it was received by "Cemo". I sinceraly believe he (Cemo) is yet sobbing and tearing at his hair. I use the word hair symbolically and with no thought of attempting to describe an actual condition.

Here is the creature's story.

(Insane larghter)
(Demoniac laughter)

(Maniacal chuckle)

(Unholy glee)

(Paroxysms of devilish joy) Tomorrow you will be the circuit 302 operator. Note on you map how circuit 302 strotches like a serpent. Yos yes yes, a green twining serpent. Note it is a north south circuit. Tyuk! hyuk! Signals will be worse than usual tomorrow! Fades will be avful! The operators in the field will forget that you have to copy designators and times of observations. They will send them in one ungodly mess as if a thousand tiny devils were dencing on their leves. And you won't know what station the weather you have copied is for. The leather Bureau will scream for your scalp. The supervisor will scowl and from. The Chief will pace the floor and await a call for the white ungon. Some operators will send their own reports carefully then send relayed reports like or may men and will drive you crazy.

(Continued on page 7)

Page 5

223 SIFTINSMOKE (Continued from page 5)

Iwants watches em an' when the come in she says, "How do you know ther'll find him?"

"They can't miss," Spitzensplutter tells her. "They's beadin' due south!" an sure a nuff they did find him.

It seems like no time a ball--it's raybe half a hour--when th' pilot calls and says, "Thanks a lot fer them there fish. Th' pils was all tuckered out from packin' th' load an' jist keeled over when they not here. I couldn't keep th' dogs off a 'em. Ther eat birds fish feathers, ropes an all. I was lucky t' git a tail on' a couple fins, myself." Then he adds, "I'll be with you purty soon, sweetheart. My dors is doin' a full gallop now."

Sure a nuff, in about a hour Blinderns lets whoop outs him from where he's
sittin' on top the antenna pole, an
comes a tearin' into th' station. They
all take a squint through th' glasses.
It's a fact. They's a dog team in sight
for sure. Iranna squeals with delight.
Spitzenseltter jist mumbles t' his self
an' calls th' chief like he promised t'
do. Th' game is still on an' ti' gang
is well into their fourth case a beer.

Birmead comes over lookin' like a sick chicken with the pip. The boys has cleaned him out of alevan dollars and some sense, which is all he's pot. Le sorta smiles though, and puts hisself down for sixty four hours overtime at other than watch duties the sorta break even. The rest a the beer gang is dividing the spoils agin.

Then the pilot comes in he aint as handsome as they figured he'd be. He looks like what you might jit if you was to shove Apollo and Abe Lincoln into one. But he's good nuff for Iwanna Mann. She drapps horself around his nock like shos knowed him for always. That's how long she figures to know him, I guess. He's all man. They's no pitting round that. Soon's he can broak loose he says, "How for the coffee and the sanwitches."

Th' excitements over. Th' guy sticks' th' gold in th' Sittinsmoke First Na-

THE MIGHTLAKE (Continued from page)

(at this path the gheatly firmer held both bony hare to its potty abdauen and yielded itself up to a bacchard an fronzy. Finally it gathered its Incolties and continued.)

and the number sequences! (Here it appeared that the night-maris' creature would again double to vit' the but with great effort it continued.) Some operators will run numbers and croups together so that if not drop one number there will not be another good space in the rest of the cour. They will carry the heather Bureau folks out on stretchors! This is the only way to lie' the b. S. Arry leather Division! They will all holler for your neck! And some operators will sand so carelessly that you can't help dropping at least a few numbers!

(The beast's voice, if such a noise can be said to be a voice, had been increasing in pitch all through the terrible soliloguv and by now was a terrifulny scream.)

There are still good operators on circuit 302 but I am working on them! I am working on them! I am working on them! (With this parting remark the figure's voice reached the inaudible range and it melted into nothingness.)

and that is the end of the experience. I have since learned that circuit 302 is not half so bud as the creature painted it. Cortain reminiscences, however, haunt and terrify all my yoling hours and make hours of sloar unendurable. By one desire is that this revelation of an auful experience will in no you affect the happiness and well being of my fellow pan.

tionel, an' th' next day him an' Iwanna rits hitched an' s'oves off for the Statos. Biggard don't like it cause he has t' go back t' work til we rit on-other grade seven traines, but he don't say much. All he ever said about it was "Dumm". I figured sombody oughts say more. That's why I wrote t' you.

THE END

OFF THE RECORDER

April 25, 1945

Hello, all you gays and gals out there. Looks like it's about time for the Fukiul news again (hope we beat the deadline) and hore we sit with tidings of info that will probably burst the coffors of the Olde Editore in the Chief's office. Things happen so fast around these parts it's most to run a man to Corningside to run 'en down.

Spealing of Lady Luck and people we know, Chief ATC Bill Bowen draws the card for being the unluckiest last month and the lucliest this month (April). Lest month Bill was laid up for quite some time because of blood poisoning, resulting from a minor injury, infecting all of one les and part of the other. He was under the Doo's care for quite some time but we are rlad to report that he pulled through and is still in one piece. Nov for the lucky news - 3ill's wife and three children, including his seven month old son whom he had nover before seen. arrived via FAA from Seattle and, if we may ret so personal, Mrs. lowen is a very lovely woman.

Mews, nows, news - nothing but newsthic north. Ith all the new errivals and decartures here it sounds slmost like a bad night on Sector No. 3 with all the interphone garbling.

we extend our heartiest relicone to Hiss Bernadine L. King, from good old ZPH. Hiss King is already sure that she is going to like our neel of the woods in spite of the fact that bad luck caught up with her a few days after her rrival and she had to be hespitalized occunt an injured foot. Le clso welcome with open arms George Surfent from the Rosnole Tower. George has joined us as Senior Controller and arrived here wight on the hools of Miss Horma Hightower, theks Field Tower Controller, who also poirreted from ZRO. Next on the irrival list can another not Senior Controller - your friund and mine, ATC's outstanding "Sourdough" and friend of he people - meaning, of course, Ir.

Floyd West from ZPQ. Welcome to the Golden Foart of Alaska, folks. You're just in time to enjoy wading through our beautiful mud and watch the ice go crashing down the main clannel of the Chena river.

Our good neighbors and colleagues Voeste, Zienke and Riedel have been very active - as usual. (e really hate to report this very sad item.) All three of the above-named individuals now have lodrings in the city hoose now. Voeste was caught flying down Front Street with a Link Trainer miching un handkerchiefs (WAC's?) with his left wing; Zienke was caught doing the same thing only in an inverted position (it has been remoured that he will get three extra years in Alaska for this); and Riedel - vell, as he told the Judge, "lasn't doing a thing but jest went along for the ride." Chief Rowen would probably have been involved in this series of monkey-shines were it not for the fact that he mistook the Link he was flying for a F-17, triby to break a dive-speed record and is now at some unknown position about 50 feet under the ground truing to dig his way back to civilization.

"elcome to Fairbanks this month also was ATC Inspector Funds, who swent a few days with us. Brother Funds likes Fairbanks second only to Anchorare but he can never stay here very long account his shoulders getting so scaled down with tears from the unfortunates (next time you come up here, Johnny, why not pad your shoulders with sponges?).

Rumour had it, prior to Ployd West's arrival here, that when he departed EQ for EX he hired three flat cers to transport an animal of some sort to Pairban's. The local people thought for sure that it must be a dimeasur or dimethere but the folls were sorely disappointed. Then lost stopped off the train he was followed by nothing larger than a 455 pound (net) malamute. Have been advised by local OFA authorities that there may be a shortage of meat in Pairbanks since 'est's arrival. This two rumours may not have any connection, however.

April 23, 1945

Fello Everybody - This is SUBHIT SLIN - THE VOICE OF THE PROZEN HORTH - HERR -SUBHIT.

the had a mild winter this year so are getting thaved out a little earlier than usual - that is, enough so's to enable us to send everyone a greeting.

No kidding, folks, this is a veritable paradise of snow and ice and lovely white-clad mountains in the winter time with the grandure of Mt. HcKinley towering in all its majesty to the southwest of us. And GATD - we have lots of them in the winter. It all depends on how well you prepared for your sojourn in Alaska as to the fun you can enjoy. Of course in the warm season, though, that is a different matter.

Last year's count of caribou that went through this valley was estimated in the nei-phorhood of 10,000. Also, the boys not some brown and grizzly bear; once, two at a sitting. We all got our rifles primed for a large white 10bb seen approximately a mile away. According to Dicl Boice, who was observing it through binoculars, it was about the size of the ordinary jacks of Texas and Lexico. Also, the ducks, the geese, and the ptarmigan are abundant in this neck of the frozen north.

Why, we even have a family of ermine living with us. Of course, they prefer the lover apartment, but spend most of our sleeping hours gnaving on our frozen meat supply which we keep in a cold box on the front porch. They will even continue to sit and gnaw on our meat while we spot light them through two doors which are tightly closed. Soon as I get my three years' residence in Alaska preferably in Summit, of course - and can get a trapper's license, I have it planned to trap my wife's first ermine fur coat right off our front porch.

Now of course, folls, I don't want you to got the idea that this is all propaganda, cause it isn't. Stillwell, if anyone is interested in say a mutual transfer - of course I don't went one (and my wife agrees) but we shouldn't 'be selfish; - and if you can truthfully give your present abode a comparable buildup - and as variety is the spice of life, it will have to differ a little in its offerings - in fact - well---before you change your mind, send me a wire collect!

Always and truthfully yours, SUBIT SLIM

WE AT SUITIT

Out towards unlimited space round about Striving to find life's secret out Out towards the earth and all earthly

Seeking the truth our spirit vings.

Thru the dark night of the Bible's story Mistories'tales grown old and heary. Thru the pale light our scientists bring Seeking the truth our spirit wings.

Onward, outward - and into the depths, Wincing, walking, then crawlingly swept Onward, fearing, towards death's many stings

Seeking the truth our spirit wines.

he are just the results of a simple act Simply produced by a chemical pact For the first few years to do simple things

Then simpler things as time takes wings.

We grow from a child of a simple cult To a cleen and strong yet simple adult who simply starts over that cycling imp and thoroly deserves the simple name Sim

When we start out in life all is simply devine
Then a short space of time makes it simp a grind
Simple cycling imp, life, love, work and death

Then perfect peace with our last simple breath.

THE XV EXTEMPORARY PROHIBITIONISTS

We looked up "sub-rosa" in the diationary after pendering over its meaning in last month's Euktel. We found it means "under the rose". Now what could anyone in Home be doing under a rose and where do they get the roses? Must have been writ by an accom.

Since the arrival of Paul and Muriel Griffith, XV has become a haven for amateur and professional photography. The lessons in oil tinting have produced varied results, from high praise to down-right insults. Also we've enjoyed Mickey Mouse and Donald Duck, even if they don't talk.

Botreon the departure of the Boblenges (Bobby and Baby) and the arrival of the Grimstads, we have the unique distinction of being manned by communicators entirely of the September 1963. anchorage class of Jim Haines, itemized as Seitzes, Sloans and Metzgers. For the info of any of you guys who haven't heard, Jim Haines is now in Alriers and also is the proud father of a baby girl.

Speaking of minor annovances, we have been descended upon by Section 99 in the person of Adolph (Mile) Peterson and ol' Bill Connolly complete with Pandora's box. They say we are about to have a new remote receiver, and the old control building is to have a face lifting; but from the looks of it now, we wonder.

Instructions for control of newly installed equipment ---

In case of fire Pull this switch: Run like hell Cause it's a ---- booby trap.

Who was it came home from a trip to torm and found friend husband (accom) in his cups? End I 'do moon cups -- and with Grandma along, too -- my, my !

Our monthly report on the beverage statistics leads us to brag again. What other station can boast of a roadhouse on each side of them. Therefore, if you ever loose your bearings all you have to do is flip a coin and you'll hit a bar.

Speaking of coins, anyone who plans on coming to XV or passing through, please bring plenty of matching money as I've had pretty fair luck latel".

Then there is the one about ACCOM Jim. Seems as how Jim was down at Lou Corblew's Concer Center bar and he says says he to Lou, quote: "Give me a drink quick before the trouble starts." So Lou gives him a drink which he drinks. Thon Jim says, "Give me another drink before the trouble starts." While Jim is consuming drink num two. Lou says! "Say, what is this trouble that is about to start?" Says Jim, "I ain't got no money to pay for the drinks."

This month's mystery: If it wasn't the RMS who locked his wife in the other night, who was it?????---or did she lock him out 1111

Had a big party the other night, complete with turkey and ice cream, (By the way, d'ya wanna buy a turkle? See RMS.) The occasion? Who needs an occasion? Well, anyway, under the able leadership of the choir master. Dines Windlsh and talented accordianist Toots (Mrs. Dines) rendered an inspired (by what?) performance. Only a true lover of the arts could properly appreciate the poignant and haunting beauty of that final number. The rest of us would only be able to discorn that "Tears on My Pillow", "Sweet Adeline", and the "Beer Barrel Polka" were being sung loudly and simultaneously in several different keys.

A.S. Erickson, better known as "Arne", is a very sad Tomato. For one very small song he would gladly sell one Eillman prospect drill, complete with three hundred feet of dry hole. 'Twas to have been a well.

Bye now. Siened SUB-TABLE

COLUMICATIONS COLUMNIQUE (Continued from page 1)

ing memorandum from the Director of Federel Airwars, which is quoted forthwith.

"Step 2 of the reclassification program is to be made effictive July 1, 1945, contingent upon availability of the necessary funds. These funds have been requested in the regular ammropriation for the fiscal year which will begin on July 1, 1945, and as this is written there is no reason to believe that they will not be available. Further information in this respect will be furnished as soon as it becomes evailable.

"Completion of the program includes the establishment of mircraft communicator positions in grade CAP-7 for the occupancy of all communicators vito stand watch alone. Promotion of personnel to fill these positions is contingent upon their possession of aircraft communicator certificates.

"Effective on the date upon which Step 2 of the reclassification program is accomplished and thereafter, no uncortificated aircraft communicator should be allowed to stand watch alone. It is requested that the rameinder of the contilication program be conducted accordingle.".

The foreroing would indicate that business is looking up and our Chief's may soon, at long last, read their well deserved place in the sirvays sun. also, a suggestion is in order that some communicators, who have been drawning their foot in completing the written and operating elements for cortification might do well to pour on a little more ceal.

The Dir eter of Federal Airways also advised us on May 1, 1945 that a project is active to establish senior eigeraft communicator positions, grade CAF-8 for watch supervision at interstate sections whore at least a continuous quadruple watch is maintained. This will tand to correct the present inequities of savral of our stations where the miditional responsibilities of watch supervision have been assumed by communicaproject cannot be accomplished until classification approval and funds have been obtained.

The personnel shorters and inchility to grant wive to our mamy dennisting employees tinues to be our rentest worry in this land of long winter ni hts. extended survey days, and a 11 by-six hour work week. The difficulties can be appropriated then 15 is considered that all except eight of our stations are on a fifty-six hour work week and none of our EMACS are pres nil available for leave relief. But hope springs sternal and the future is not alterether dark. hon HC-1h comes howe this month, she will bring to this fine country twentyone communicators who, when indoctrinated into Alaskan communications, should enable several stations to revert to a fortw-ai the hour work week and permit us to approve seme of the leave amiliestions now on file. In the meanting, we ask that you continue to take core of the sirvers. Your efforts are recognized and appreciated by the entire organize-

Until next month -- good signals!

EFFICI "C" RATING TRIP

The erew of 10-09 during the recent Efficiency lating trip, pilot Marry Gray accommanied by Bill Gress, wish to re rprose their appreciation to all concarned for the cooperation and hearitality extended at all points visited.

The primary purpose of the brin was to fundlitude discussion of "I leieney To time principles and procatures with field supervisory personnel at as mony points thick could be reached consistant with moons and time available. It is regretted that mera stations could not have been included in the itinorery.

Doparting from anchorage on April 5. the trip was completed by April 27 and included the following stations which are listed in order of progression: Farovoll, Fedrach, Galama, Loses Point, Unitablect, Mond, Tonona, Pairborts, Monena, Lake Linchamine, Suntit, Toltors without suitable compansation. It | hastna, Culbana, Tamacross, Ecrthoga, should be understood that the latter | Big Delta, Emai, Homer, and Ilianna.

April 15, 1945

Grantings from the bearburger village.

after having been here for nearly a year, we are now realizing a long felt ambition, our contribution to the Mulluk.

To start with, our present complement is rather a thing of the past and yet, alas, our dreems of the future (soon we hope). Constser is stil! here, hoping to be transferred soon to HQ. Bob and Dot Halbasch are in the harness as usual. ZZ seems to hold some autraction for them. Wonder if it's these juicy bear steaks we hand out so liberally or rather I should say used to. Bear steaks no longer are in demand at ZZ.... londer why?

The Saiths of Northway hit upon a rood idea when they succested the idea of a little competition from other stations. I em sure no one can outdo ZZ on our numerous and very delicious straw- ! bergies. The natch extends for nearly a mile on the rest side of the runyay. Every miracle has its price, though, and plenty of small and blood (and I moan loss of blood) goes into the work of obtaining them. For one thing, the bugs seem to like the berries as well as we and it's a major massacro bring to get them first. Last but far from least the brownies. The brush or rese is ! ries are at the bottom so it is not at all unusual to be very busy picking and suddenly hour a rustle and upon investiration find a boar has just depurted the vicinity.

to have a new RMS as of a few months aco, Ch.t Hill from SK. He is publicatly avaiting the arrival of his wife and family from SM. (Soms so though all Alashans over do is "weit" for semething or other?...?) Our machanic, Fundam, is departing ZZ for IQ shortly. Our favorite pasttime is ther fore shot poker and pinochla. ZZ is hereby open for bid on any qualified players. Hurst. if you'll come down we will even resort

(Continued on next para)

The CAA Section Ida Modification Panear at Herrill Field has been busy turning out some air lanes again. Among the latest is the Furst's Lockheed Endson MR 254, dubbed "The Torror", complete with a colorful insignia of a froming, snorting bull (Burst can really throw it around, too). There will be some changes made in the coloring of the present white eyeballs of the Bull's head, the first tile Hurst comes in after a hard overnite stop. Surrested colors range from black to red, with bloody tears.

The Douglas Dolphin, NC 25, was in the shop for complete check and servicing, readving it for the regular summer season. Morning is anticipaling getting his Laster Pilot's License for inland seas after an Aleutian junket. (Meeded: 1 Plumber's Friend).

GI's Stinson, MC 216, "The Flying Sadio Station", will be out of major everhaul by the time the lukluh goes to pross, looking very nest if we may say se. It will really be a complete Instrument-Radio Nevice Sion Prainer (complete with hot and cold water).

Rogers' Bellanca, MC 5, is gotting its right wing recovered in preparation for float season. The right wing has not been reworked for three weers. It's about three foot light and the bast ber- always been the left one that sustained the dumage and been completely rebuilt from scrabel three different times in the last three years. It should be read in several works.

> The two Bosch twins, Navy 90573 and 79, Horan Davies and Al Horning, have been avera ing 75 hours such a month, touring the Chain and Territory.

> GI's Stinson, NC 39, is now being readied for the summer float souson covoring Bristol Bay and Southeastern Alaska, as seen as the ice goes out at Lalo Spenard - if, as and whon, and we hope maxt wack. (If the ice goes out at M mana on my ticket, I'll go too!)

> > (Continued on next out)

and the Girls." Floyd West took off for Fairbanks Center and John Maw and Albert Lockett are due for transfers to Anchorare Center as soon as the two girls from the States arrive to take over tower duties. And to think Chief Kelly is almost single yet.

Thile we're talking (rather writing)

YAKATAGA (Continued from page 12)

to the black boy.

e are slightly late for the following, but at the same time we would like to offer our congratulations to CAC Westman of KA on his new assignment with McKay Corporation. Hear he will be leaving shortly, and above all, many thanks to the KA personnel for their splendid cooperation in handling our monthly "grub stakes".

We enjoy receiving the monthly issue of your paper, even if they are a month or two old when received. Consequently it takes us a month to read the material on what happened the month before. Get what I mean?

In closing, I found a poom on "Trees" that we thought rather amusing. Laybe we are rusty on what is amusing but here it is.

"NOTHING LOVELY AS A TICLE"

Of all the things I had to be I had to be a lousy troe --A troo that stands out in the street With little don ins at my feat. I'm nothing clse but this, clas, A comfort station in the grass. I lift my leafy arms to pray --"Go tway, little downie, go twey !" A nest of robins I must wear And what they do gets in my hair. Of all things I had to be, I had to be a lousy tree!

Enuf said for now. See you again sometime.

7318 V ZZ

Won't be long before it is "Just Bill

Still writing about Kelly. Came conversation over the interphone that someone was very ill at Culkana and could ther get to Anchorage and a doctor.

about Kelly, the Irishman, we might add that he is now a certificated commercial

pilot and instructor. Fe's already busy

OIL LEAKS FROM TIE HANGAR (Continued from pace 12).

Jefford, our Chief, is preparing to return from Santa Monica around the midmonth with our Douglas NC 11, after the periodic major inspection and overhaul given old "King Chris" there, and after his (Jefford's) enjoying the sunny California and the good looking cirls, and Bill Hanson's going to instrument school at Houston, Toxas and squawking because all the good looking cals have deserted Texas for California.

The lanear can now boast of soon having the most modern fire protection equipment in and around Anchorars, when the big automatic pressure sprinkler system is complete.

Just to feed the fires, Eurst has announced his flight schedule for Jefford's benefit, as follows:

NC 14 departs HQ for YO, Jefford Captain

Hurst arrives at Herrill Field 9:30 AH Hurst at Airport Cafe - Coffee

10 AH NR 254 deports HQ for YO, Hurst

Captain 12:30FM MC 14 arrives YO, Jefford still Captain

12:32PM NR 25h arrives YO, Murst Captain 12:35PM Jofford & Eurst match for lunch

(Jefford loses amain) 1:30 H! NC 11, departs YO for IQ, Jafford Captain

2 IM MR 254 departs YO for MQ, Hurst (after another cun of coffee)

MR 254 arrives IQ, Furst Captain L FI

5 M NC 14 arrives 12, Jefferd Captai 5 PM Hurst happy as a clam at high tide; Jufford tired as hell!

INSIDE GAMBELL (Continued from page 2)

and these opinions depend on the time of day, the weather, the number of months elepsed since the last mail, and other factors," he explained.

Additional enlightenment on Barnhart's attitude was furnished by CAC Dick Bryan. "Hary a call windy morning," Bryan said, "I have seen Barnhart philosophically praising the quiet remoteness of our little community far from the madding crowd --- the unbroken stillness, the vastness of icebound ocean which surrounds us, the unique opportunity for meditation and communion of the soul with the magnificent solitude of nature.

"Then would come time for a pibal observation," continued Bryan. "Barney would don his perha, hood and mittens and climb the precarious icy steps of the racb building, often slipping and skinning his knees, to watch through the thodelite the diminishing balloon, with freezing nose and aching fingers, until frest on the lens made further observations impossible.

"Suddenly as I sat copying hourly we ther reports there would be a slamming and a stamping at the door of the control building and in would burst Barney, face raw red with white frozen splotches, feet numb and whiskers icioled, and for a minute the air would be charged with unprintable expletives.

"Calming to coherence, Barney would exclaim, tahy anyone wants to come to this God-forsalion, frozon, uninhabitable, isolated icebex of a penal colony I can't see. I was a fool over to leave Tallahassee. Page Page's the place for me, and that's where I'm going next plane. Enough of this ice and snow, burrregh, nothing but wind wind wind, fauch!"

"ith this," concluded Bryan, "Barney would wor! up his pibal report, plunk it down despairingly beside my key and stumble homeward to a cup of the steaming and the arms of sweet Morpheus."

Page Page (pronounced Ponge Ponge --Burney insists on this) is located on the island of Tutuila in the South

Pacific Ocean and is the capital of American Samoa. The population is one thousand, the climate is tropical, and the sunshine is abundant.

"Think of it: Bananas will grow on trees right beside my door," muses Barnhart, dreamily munching a piece of walrus liver.

WILL WINGED WAGON MEND WAY, QUERY (Reprinted by special permission of the Sevuokok Clarione)

Bate - any day

In spite of a definite promise to make the trip, the expected plane at a late hour today had not departed from some for Gambell. Speculation among local citizens reached fever heat as the day were on without the plane arriving.

The mystery of the non-arrival of the sircraft was deepened when a perusal of the Gambell weather records revealed that the weather had been extremely promising during the forenoon. Visibilities, characterized as "excellent" by the teather Bureau, reached as high as one quarter mile at times, with light snow and heavy blowing snow. A touch of spring was added by wind velocities reaching sixty miles per hour in strong gusts. These velocities, of course, would do much to facilitate the plane's landing, were it to come.

All in all, there seemed to be no valid reason why the plane did not arrivo. Indications were that the citizenry of Gambell were taling a very serious view of the situation, with mass meetings being held throughout the day. It was felt that if the plane did not come by temorrow, local officials would have a hard time helding the people in check.

UMGUDRUK TONSORIAL PARLORS ESTABLISHED

Amouncement was made last week of the opening of the Ungudruk Tonsorial Parlors at Gambell. Hirsuto personnel by the dozens flocked in to be shorn of their locks by expert barber Irving Ungudruk.

Said accom Ungudruk, "In the past I

(Continued on next page)

INSIDE GAMBELL (Continued from page 14)

have cut hair for many of the folks here without charge, though they have offered to per me for these services. Now the demends on my professional shill are such that I have decided to fix a charge of fifty cents per haircut. This has proven satisfactory to all concerned, and the only thing we lack is a red and white striped revolving barber's pole. Anyone knowing where to obtain some please address a post eard to the Ungudrul Tensorial Parlors, Gambell, Aleska."

Ungudruk further informed the press that he is operating a radio repair shop in connection and has advised local residents to bring in their riddos when reception is poor and he will return them in a few days as good as new (when the fade out ends). Charges for this expert service are reasonable, he claims, in view of the vast bechnical knowledge needed to perform such delicate repairs.

REAL ESTATE BOOMS

Construction of dog houses on the FPHA plan received a new boost during the preceding month when a total of two dwellings were completed. Leading contractor in the new development is westhermen Lee Webster. Models available include the 8-foot packing box type and the 2-foot prefabricated puppy size quenset.

Said husband Webster, "The fact that there are now four married couples at Gambell has absolutely nothing to do with the current do-house vegue."

"PARADIST ISLE", AVELS ROSTUEAU

Hotly denying grapavine rumors that he is dissatisfied with Cambell, accommosic Rosenean today declared to the local press that "St. Lawrence Isle is paradise isle for ms."

"In the early morning," rhapsedized deseneau, "I eagerly watch the graceful crows wheeling over the central station while the sun comes shimmering up out of the salty Siberian sea, and I feel that here at last is the promised land, the spot on earth for which I've always sought."

Questioned as to how long he intended to stay at Gambell, Roseneau said, "I have alread picked out a rect high en the hills where I will be laid to rest with me proben dog sled beside me, according to the encions Estima custom. Meanwhile a long and perceful life will be mine, with never a worre or care, hunting the values and the resta while my faithful Es! inc maid smeets the floor and dusts the Armiture, traversing the tundra these sunny summer days, camera in hand, the din of civilization an evil dream long since for cotten, learning the lenguage of these simple foll, corving ivory and corpiling data on the island's flora and fauna for the edification of nosterity."

> MERRILL TOWR (Continued from page 13)

Helly contacted the Army and talled them into the idea of having a ship curcute from Tatron Lake to TEQ pic! up the petient. At last report said patient was improving. ATC, under Jim Tarphries, pulled the same tric! still more recently when a vomen was very ill at Culture. A plane and doctor left Elmendorf for the patient.

Controller May is not recuperated from his mismaneuvering on the ship. He's not a new camera and is taking pictures of the country "to show the folks back home."

Flord lest and his whisters have gone to Pairbanks (or did to mention that before without the whisters?).

Failure of cors to stop at the stop light at Perrill Field has caused no end of worry to tower mon, pilots, and drivers (when they suddenly notice the sirplane on the north). So the city fathers, highway patrol, and a for others not together and started an educational plan. The first night was just for fun, but the patrelman was more than busy getting the many violators. The all mot cautionary tickets. No. 1 to get tagged was a CAA our. and or all persons it was the man we do not on to breen the tower equipment in worling order. o suspect we're at the head of his list, but he says "all is Corriver."

HUK FOR THE LUCKLESS MUKLUKERS Henana, May 3, 1945

Boesn't anybody miss us on old 303, or is it good riddance? On second thought, better not answer that. You all should come up our way. We have a pretty slick set-up now. Poor old FX does our cht 303 ing for us. Fine business. He poor innocent ops have gotta wrap some Baudot tape around our gray matter some way or other and get some rhythm on the old teletupe to FX, though, so you see if it ain't one thing 'tis unother. We kinsed 303 good-bye with pleasure, but now more qualifying to de.

Spring definitely is here today, but resterday was, and maybe temorrow will be, a different story. We had a nice bliz' on the first of May -- talk about Hayday. An old-timer here in town said he has never seen such a cold spring in 29 years. So the ice sits on the river and smirks. The boids are flitting back and forth (that's back and forth from the South to here -- the poor things can't make up their minds).

(Continued on page 3)

. . . SLOV LEARS HQ/KCDW/KIS . . .
