MOSES POINTERS August 12, 1945

Being in the Delinquent Donation | Department and for some time unsung in these hallowed pages, a brief geographical description is herewith forthcoming, togoliting primarily those neophytes less conversant with this attic paradise.

" of it have water north, south, each and west ... . well, west a lil strip | Corner". of twara furna lurches off in the general direction of YO, End of descrip.

with all that water, fishing is in order, and many fine trout have been taken. At present the local anglers have been busy with the silver salmon, interspersed with numericus whitefish and tan cod. Fine recreation 'providing one has a gallon of Staway handy.

The local OFA, Legree Argall, goes commercial with a canning outfit and is threatening to demoralize the commissary with a black market salmon blitz, CAC Uzzell (rhymes with guzzle) tried going native with a fish smoking rack but had to give up supplying said rack via rod and reel on account the HG sea gulls were in on the take 100%, so now he has tied a lotte holes together for a net, intending, it seems, to feed all the sea gulls in the Righth Region.

On our only summer day, July Fourth, . a picnic with all the trimmings was had and enjoyed by all, including the HG variety of mosquito. We have the jet type employing the atomic bomb principle.

Earl Alden's better half recently made the jump to "7", which news was lost in the shuffle when their dog Jiggers ran afoul the Galena end of a Nome bound porky, coming off second best, maxing an ITR departure, full throttle and cruising 5/otp with all flaps flapmint. Pliers dame in handy.

New arrivals, the Hutchins (mechanical department), like HG very much, Sez they, "Home was never like this."

The Ericksons are the plank owners, and, with all those planks, seem intent on planking un the doors and windows of their little cottage by the sea to hie themselves to sunnier clines sometime in

Last but not least, one ex-member of Lamb's Harem of HQ fame, Eileen Melander, and Her worst half are waxing fat and sassy in the benevolent aura of this little communicator's "Dream-around-the-

How George Hisself

"BE BACK IN A MINIT, DEARIE"

We see it every morning, It happens every day; A double line of female clerks Meander on their way.

The thing that puzzles all the men And gives the boss gray hairs Is when girls go to the powder room . They always go in pairs.

Perhaps the trip is long and slow The hall is dark and lonely But two by two they always go To the door marked "Ladies Cnly".

The poor boss waits, and you can tell He's simply torn with grief. The day's production goes to hell While the girls co on relief.

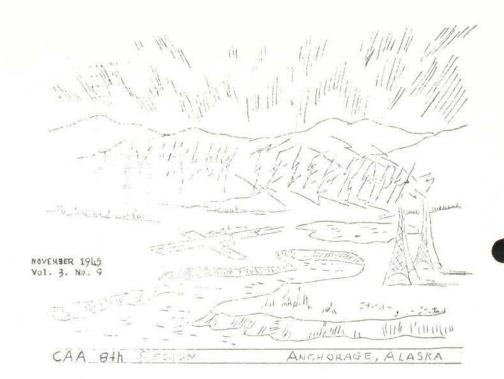

At two o'clock each afternoon The march begins once more. What the hell goes on out there That cannot wait till four.

The only way that I can see To make production boom Is to move the whole damn office Into the ladies room!

COMMUNICATIONS INSPECTORS AT WORK, CAUFN

With a month or two remaining, this is not the point at which to close out our report on communications inspections for 1945. We still harbor plans for more field work before the old rouse with the long-handled soythe lops off another "ennium" and starts swathing his remorseless path down the next 365 acres. We find the old gentleman never operates on a share-crop basis. He shares time with no one.

Not to close out our report but to merely convey its current status, we list hereunder all stations having had inspections since January 1, last. They total twentv four from north to couth and east to west, and represent many miles of travel in the performance of the Rite of the Stop Watch. The alphabetical listing means nothing. The next inspection is just as likely to strike at a "y" as at an "A", and being listed herein is no protection against further inspection in the near future.

Anchorage	Homer	Sitka
Bettles	Iliamna	Sliwentna
	Juneau	Summit
Cordova		Talkeetna
Fairbanks	Kenai	Tanana
Farewell	Kotzebue	
Fort Yukon	Minchumina	Unalakloet
Gustavus	Nenana	Yakataga
Haines	Shungnak	Yakutat

Use of the new Form 450, revised 3/1/45, (replacing the old Form 450 in use since 1939) and the newly inaugurated Communications Inspection Check List, allows a greater expression of comment, recommendations and general information. The over-all value of the reports, we feel, has been increased.

BCURNE RESIGNS (Continued from page 1).

Mr. Bourne stated that he planned to remain in private aviation activities so that he could build up the services of the Maryland Airlines, and "since it is my genuine desire not to embarrass the Airways Organization, the Civil Aeronautics Administration, or the Department of Commerce through activities which may be required in these undertakings by a man on leave from the Government, I have chosen an outright resimpation in preference."

In accepting the resination, Mr. Writht wrote he was sure that Aeronautical Radio, Inc., an organization owned natually by the airlines, for whom the sirways job in Mexico will be performed by Mr. Bourne, and the Mexican Government "are fortunate in having been able to secure the services of one so outstandingly qualified."

in April, 1927, when the Bureau of Light-houses administered the meaner airways facilities provided for airmen. Fe served in the field in establishing and building the first facilities such as radio ranges and communications stations, and progressed through various jobs in the airways service to his position as Assistant Administrator. He is known among airline and aviation pioneers throughout the country familiarly as "Tommy" and as one of the fathers of the Fation's airways system.

He learned to fly during the last war, holds Pilot Pertificate No. 209. He was born on a farm in Saltimere County, Haryland, has six children and lives now on a farm near Millington, Maryland.

-- Office of Aviation Information

I am a little CP. My father was a big Navy "C" (Cigent Dispatch). He carried word from the submarines and destroyers back to the battleship admiral, warning him to get set for a belly full of enemy torpedoes. My mother was a little Army "P" dispatch. She corried rush instructions from the general to the troops out in front, commanding them to hurry up and make the attack before he got his pants full of bullots.

I am a little CP. I'm hot -- hotter than a red-haired control tower operator.

I have been working for the Army, the Navy, the Marine Corps and the Corst Guard; now the war is over and I have volunteered to work for the Caa and the air lines. But it is a gigantic task. I am always in such a hurry to get my job done and I am subjected to so many unnecessary delays along the way.

You can't possibly understand what I mean without taking a trip with me. The dispatcher is a nice-fellow; most dispatchers are that way. He studies wrather, checks the load, and tries to figure a way to have enough gas to reach an alternate airport. After all this is done he must get word to a pilot saveral hundred miles away who has a short turnaround and is wondering thy those so-and-so's back in Oberations Office don't get off their what'sits and give him a release. The pilot is "fuming"; pilots are that way.

The dispatcher calmly sits down to the teletype -- in Alaska dispatchers are teletype operators and radio operators as well as dispatchers - and writes out a release to the pilot in Juneau. He massages these keys so gently; in about one minute I am a complete "CP" dispatch contining -bout ten words. He rings two bells (the HQ Anchorage call).

Now I am in the EQ teletype room. Two efficient girls are basily engaged in relaying weather reports and expediting other "GF" dispatches. Will they never see me? The dispatcher rings two balls again. Still these busy occurrent eaters do not see me. Finally the dispatcher rings a string of balls and jiggles the carriage up and down. The

shock is terrible; something like the rough seas my father once told me about. Ch! will that 'teletyde rirl never sea me? Here she comes! She tears me off the machine and rives the dispatcher an "okay". 'Three minutes have elapsed. She dashes over and places me on the traffic checker's desk in mething flat, but she doesn't shout "CP". That hurts my pride a little. I should go ahead of all this other hay that is lying around.

The checker doesn't notice me. . She is busy, very busy, logging traffic, filing traffic and trying to keep the hooks clear. There is hav in front of me, hav behind me, hay on both sides of me, and the teletype rirl just dropped some rush weather on the desh so there is hay on top of me. Presto; the checker picks up the rush weather and takes it to a radio circuit. I can broathe again. At least that is a relief .- but why oh why don't they give me proper recornition? The checker returns: she reaches for me: now I will be on my way. I am moved about two feet to the left without enjoying so much as a glance from the checker. Now there is more logging, more traffic filing and more clearing of hooks. What would my sponsors think of this treatment?

My sponsors are: The Linison Officer who was born with a vibroplex in his hund, raised on a bottle and, according to rumors, nover wouned. He is an old occurred telegrapher who insists that any mussage should move through the station in a minute and thinks he is giving the communicators a helluvabreak when he sots the limit at 5 minutes for all "OF" disputches. The Chief of the Rudio Communications, an old sailor who would brook his arm reaching for a bottle of gin and would raise a hollowustink if "CP" traffic didn't move through the station in 5 minutes. And last but not least is the Chief of War Measures and Procedures (plus CEMG), who will roll the dice until the communicators are rolled out of their rolls and then write them up for doleving "CP" traffic more than 5 minutes during a crap same. That is the line of boats the communicators and I have to buck.

(Continued on page 5)

It has been some little time since you have heard from Construction Unit. The truth is we lost our nice editor-inchief, dillian ". Pattor. It was with a sease of gride we turned in to the loklul articles ofited by Fr. Mattox. "Tex", as he is known to many, and wife Virtinia left for the States in October. Watre hoping he will remain with CAA in the States. Glen H. Noitzert is the Project Engineer following Tex Hattax. Mr. Hattox had previously taken ir. San T. Kelsey's place, he hear but Mr. Kelsey is in a California bospital.

Since you last heard from us and have lest two of our mirls, but slroady have filled in with two wise formerly employed at Fort Michardson. First wo lost Time Kapennic, probably known to you as the "Teeglater". Time will soon te on her way to Lenden, England, having completed some proliminary work in Washinsten. D. C. Mary Maurer, who came to Construction from the Denot, luft for the States in September. The two charming ladios ropleciar Tina and Hary are Miss Deleris Page and Sorok Rathstoin.

Recently resigned are Engineers Alvin T. Lyso and Edwin D. Blair, and Sonior General Inchanic Gilbert F. Arenale. Our new mechanics are Harry Christianson. Gilford Lormon and Axel W. Hattson.

With the closing of gover assignments at Cordova, Gustavus, Middleton Island, Maknek, Big Dolte, Morthway, Hemo, Bothel, McGrath, Munana, Swamit, Umslakloot, Gombell and Siventha - to mention a few - there will seen be an influx of engineers in our midet. Will lot you in on a sucret - plans will soon to promulated to kuon them buti a thon

We are harry to report our Resident Engineer at Hora, Joseph E. Walsh, was married recently to Mabel Meter. Emily Post save you should wish the bride haptiness and constituints the ercom. As Joo has been with Construction Unit some four yours and knowing him as we do. wo'll take it upon ourselves to con ratulata the bris. To wish both of them a lot of happinges.

Mr. Brond oil suggested an item of interest to dahluk renders might be - he will like us as we are.

The branch organization has been stron-thened by the recent strival of rs. Lois E. Robinson, who is holding Porth in the Communications Incerniarity Typing Densitiont. As Chief "typerouter" she has already worn out one typewriter and is making satisfactory pro ress toward the destruction of a pecond.

Another recently added super-slouth is hr. John R. Turner, who halls from Grand Island, Betraska.

with the increasing number of Analysus, no reason can be given for the decreasing number of irregularity reports being issued unless it is due to the fact that communicators are hitting the tell more regularly for Prs. Rebinson's bypowritar is worn out again) or fadeout conditions are procluding reception of many stations.

"The Perserinesions" of our engineers. After consulting Bosh Webster about "paragrinations", wa report: George \_arabelnil off is et proyent on an inspection trip with Julyar, Laver, might and Goodwin at Mitulerse; J. L. Conners has just returned from Hoses Point, where he wont to ostimase the demark done by rount hirl winds. He could have gone right took to ustimute the lame to by fire to the Utilities Building. John A. Broadwall resently visited Cordova and even more recently was in Federath and Bitbel. We wender if he likes the outnests titt r than us; he used the old gag "Wonthor too tad to fly".

That brin's to mind the impossity Edisplayed by our engineers when they sat up their transits right here in Construction office and brought to view the army transport olan, which recently fell . in the nearby mountains. We would have or forest locking at a hanning sight, but those of us who had never looked thru a transit new have more respect for that pine of ongin ring equipment.

Was in Construction ward sorry to lose Norshell C. Hemmin as Rusional Administrutor but will whole-harrhodly buel; our now Administrator, b. P. Platt. We hope

Numerous changes have occurred in Section W. in the past few weeks.

In the personnel sphere, Parry Gray decided that twenty months in the Prozen North were plenty and transferred to the Fifth Region, Kansas City.

Next Al Lorning moved into bown to take care of the duties of the Assistant Superintendent of Airms. So now we have only four bilots answering roll call in b.

Our plane personnel, too, has undergone a change. Bellagen AC-", one of the real old-timers of the Wielah contan, made a forced landing in rough water ! south of Seward the evening of Deteler | 10th. A Coast Guard bont risked un Pilot Fuzz Tomers and his magrantor, Thad Bryan, but Bellones NJ-9 sant to the bottom of the ocean. Now it rest in

A few days later Jim Purst and Fuzz Rogers flew to Vashington, D. C., in the Boeing 247-D, 20-13, slee known as King Arthur, This trelve-weer-eld veteran has been honorably discharged from alaskan service after more than three years. of carrying freight and pussengers to all parts of the Territor.

After a few date sojourn in bushings t ton and Southern California, Jim and Fuzz returned to Anchorage, proudly flying a surplus army S-in. The newest addition to our fleet, it is to be christoned NO-5, the it bears but little resemblance to MC-5 I or MC-3 II. Incidentally, you may have thought Jefford and Hurst wore rivals before, but "wou ain't seen nuthin' vet".

While all those clances were going on, Jack Jefford and Morean Davies were carrying on as agual, bauling frei ht and passengers and making fill he checks. They were really Lapt working, too.

Now that you have, the big freighters and two good paired plants, plus - . It's bon a long time since we've little Fairchild and a trice-and-true | No.rd from Det'el, Annett: Island, Pareold amphibian, you can expect to get four very busy Airways Inspectors. You will have to look f. st. the. They den't stay long in one place.

Ur. Cr + of Training and Parformance is current in Seattle rettion our Cotober class of 15 Aircraft Communicator Trainees off to a good start. It is interesting to hote that a prominabely 75% of the new class are velerans and approximately 50% have 'ed are provious communications experience.

. . . . . . . . . For the followers of Oplonel Stoopon-lets Suconsriet in the Saturday Evenint Post we hereby Speen up the fellowing except from Transical mir Mavica-Cion".

# THE REAL PRINCIP

If it is feel to to cultur a reat tirels braut, the braut bust first fee grava en a real lirela elevi (Pronomia injustice) as a straight line. All read tireless undear as suri int lines. The piont hotted on the reat mircle churt is then redsterred to ble trendafor conjection, joint in joint, by latitime and loadinate. (As you know, the s'ortest disconce between the Joints is a rkunt line). The distortion of the branester samisation is thatch set the rest irele amears as a lurved line on the diart, as should it lere won or ran the thunb bine; this is con the mase, of course. The lurved line on the truncater is breat notes from into a berses of nuttions of convenient length, and the thunk kine fourse for each borned is dollowed. In this way, the rest gircle brout is composimuted sich a boriss of thunk line fourses. For se some plready numgered, the primarier confection mes hot in Congraily adopted nor foose in air mavi- tion. The only Transator places nor fair avication consur of a sistering of super-ow min objects along our cousts, builtished mis the Cara raphic Evrhus of the Stonmited Yates Hovy. . . . . . . . . .

I'm't issue, Speening'in the adiabatic Lacred Librar. 

roll, Fort Yelon, Lines, Josef, Illiana Morek Dutch Inland, Programmer or Chungall. You about some letting for the Documber issue?

# LIFE OF AN "OP" DISPATOR (Continued from page 3)

I have been here now for six minutes. The supervisor can do nothing for me; he is snowed under with interphone calls. telophone calls, routing traffic and wondering whether he is going to be promoted to the supervisor grade or continue to do the work on communicator's pay, as he has done for several months. The Assistant Chief can't help me because. he is trying to check traffic against records that are not quite complete because the traffic checker was snowed under with paper work the night before. Appealing to the Chief is cut of the question. He is busy making reports, reports, reports, correcting "B" manuels. checking the payroll, making she daily quota of corrections to the MACCS, and other CAF-L work which provents him from performing the duties for which he is arrived yet. Then this 302 baby really paid.

Glorious day: After 13 minutes that sweet little mirl has miched me up. At first she is startled by my "CP" classification; then the wheels spin in her head. She can't send me to Juneau, my destination, on circuit 304 because Juneau has discontinued the 70k watel. due to a personnel shorte o. For that I am thantiful; there is a hairy-chested man worling on circuit 701. She carries me down the wisle. I am dropped on circuit 302. Curses! Another man working this circuit. Why couldn't I have been left on eircuit 301 with that little blonds? Well, this seems to be my fate. He looks grouply -- most mon are that way -- but I can see that he is a hard worker. It's sequence time; he punches, transcribes and repunches like a madman. |

After 15 minutes there is a slight pause, and the big porilla custs a glassy store around the operating position and picks me out from a dozon other messages. Horo is a non who recognizes "high-brod" traffics. I am beginning to have a little respect for his ability. He quickly slips me under the message holder on the Kleinschmidt and starts punching. Clancing at the tape with his left eye, he discovers that some of the too holes are not out through. This is the first man I have ever seen who could cuss like my sailor father. The temperature coos up and the air turns blue. A maintenance man, on the allort for equip-

ment trouble, comes over to investigate. The maintenance man says he can't slip in a good Aleinschmidt because the station has not been equipped with spares. but he will fir it as soon as possible. This maintenance man is a "shark"; he has the machine fixed in five minutes, The cussing, hard-working 302 operator turns to the Kleinschmidt and punches out a perfect tape. Ah! At last I will be on my way at high speed. But no! The Juneau operator who is on the job starts breaking; the muscle-bound 302 operator lifts the wheel and Juneau says "bad tape". The puncher knows it isn't bad tare, and the air turns blue again; the cuss words roll out like a volcanic eruntion. The maintenance man, still elert, steps over and says there isn't much he can do about a bad kering head because the torgle blocks, ordered in December and re-ordered in July, haven't blows up. He says, "I used this old soun bone to send with before they had autometics, and 47% & I muess I can do it nor." He reaches for his bur and calls NEAA.

Sweet Suc! Such code! Not the square dots and round dashes the inspectors send to you for a test, but smooth, rhythmic, perfect stuff, the lind of code an automotic head tries to send. I have never travelled on a magic corpet but it couldn't possibly be more beautiful than the ride that old operator rives from Anchorage to Juneau. The Juneau operator, another "dis-hard" telegrapher, comes back with a snampy "Ca". In less time than it would bake you to say "Jack lobinson" I am delivered to the airline representative in Juneau. 15 minutes after bein' sent bo the dispatcher. I am old, much too old to serve the dispaccher's intended purpose.

I have been told that the Chief of Communications has rewled to the Chief of Simula and the Chief of Simula has propered a plan for a "sure-fire" multichannel VMF communications system. The mlan has the concurrence of the Superintundent of Airvers; and the Regional Administrator save if Congress gots off their Tobays (or whatever is the plural for Tokus) and appropriates menoy, we will have a first class comunication system complete with spore parts and

(Continued on page 7)

#### NOWE HEWS

By Kansas City Moe and The Tanana Kid

PREFACE: The "T" Kid took time out from his other pressing duties, which consist of sitting, to edit the following by Mansas City Moe. Thus all in paren comes from his estensible brain.

### PART CNE

Seems as how YO has been off the record for a long time, so this reporter (Laugh here) will attempt to enlighten the few who might be interseted in recent happenings in this busy little corner of Alaska.

We received several new ons from the latest Seattle class, and were we glad to see them! Cuz at the time several of the ops were playing it sick (Here I was dying . The new arrivals are Mr. and Mrs. Tharp and Miss Joyce Gunderson (Whistle here). Helecme to YO, good

Flash ! Flash ! Harry and Helen Hauran are the proud parents of a baby mirl named Kristi Arlene, Horio has been passing out the cigars indiscriminatoly | ha: (No more like dat word or 1 quic), So that explains any runors that the green men and wamen from Para have invaded the | YO scatica. (My, my! After seeing those women smole dom stories I just about decraid my place was the bitchen.)

Mr. Peterson and family arrived several weaks pust to relieve Lr. Princle, who is now ut Tlamma. Both great guys. Ya, Habel, I'm still working for my seven. Foto and family are fugitives from Farewell, which all sums up to the fret that to're darn glad to have you with us and wich Gray and family a lot of luck. (Them my boss. Good para.)

Please disregard any rumors you might have heard or vill hour about house "3" at home. We ver a dull moment, though,

Locks like the entire region bid on those openings at KD, and Home did its sharo. (This is one I and the off on.) Ala the single gals at YC lost no time in speaking for themselves. 'Guess they don't (We my cooking.) Can't see what all the ttraction is, gals, or are you soured on 1172? Tsk: Tsk: (Never heard of girls getting bushy before.)

That's about all that the literary talent (I wouldn't say she used the ord loosely; she threw it away) of this reporter can offer at this time, so be CNU in Nuktel.

Kansas City Mce

#### PART TWO

Hiya, fellows - and cirls, too, since seems as though there are a few of you in the good old C.A.

After reading and oditing what "Mansas City Nos" had to say thought I, The Tenane Mid", or ht to 'ivo you an outsider's viewpoint and tell her to go back on sick leave. Confidentially, she has racs in her head.

Everyone is very happy hare at the station since we have received a total of five new operators in the last month from the U of CAL Seattle. How we have to tend only one circuit at a dima and are back on a fifty six hour work week-Out of Class Eleven we received, C. O. D. via Jefford and Panson, Miss Lola Tarson and Mirsti Fundaun, two Irish lassies --

Just one more item I'd like to put across before retiring, he really have a swell station here at 70 and a swell bunch of personnel. Besides having our porties, which include bowling, huntily, hilling and tennis, we have procedually the whole cang lined up for chain; and ice stating. Aint of feel sorry for you foll's that don't get to work up here.

The Tunana Eid

# LINE OF AN "CF" DISPATCE (Continued from page 5)

onough communicators and maintonance mon to do the jul. Then the Linison Officer can go over and cole-raph for the Siberian Reilroad, the Chief of Radio Cormunications can go buch to see and the Chief of Wer Persons and Procedures plus CEMC can roll up his African Cominous and me back to South Carolina. Meanwhile, the Chief, Assistant 31d ., supervisors, accommisators, traffic checkers, meintenance men and I will buttle the edds.

O. P. DIGPARTO
