## TEELE ANNOUNCES PUBLICATION OF NATIONAL TRANSIT DATA

Arthur E. Teele, Jr., Administrator of the Urban Mass Transportation Administration, today announced publication of the second annual report of the National Urban Mass Transportation Statistics.

Financial and operating data contained in the report was submitted by 321 public transit systems. The data is required as a condition for receiving federal funds under provisions of the Urban Mass Transportation Act.

The report is organized into two main sections, Aggregate Transit Statistics and Individual Property Statistics. Each section is grouped by transit fleet size under four major headings which include transit revenues, transit expenses, non-financial operating data, and performance indicators.

The financial and operating statistics and the performance of individual systems are organized to assist the reader in viewing each system within the context of other systems of comparable size and with the industry as a whole.

A limited number of copies of the report are available from the Office of Technology Sharing, Transportation Systems Center, Kendall Square, Cambridge, Massachusetts 02142 or the Office of Public Affairs, Urban Mass Transportation Administration, 400 Seventh Street, SW, Washington, DC 20590. A self-addressed mailing label should be provided with the request.
