THE FEDERAL AVIATION ADMINISTRATION'S AVIATION EDUCATION PROGRAM:

"Safety in the Skies through Aviation Education"

Aviation in the classroom is exciting, fun, and rewarding.

It's history, geography, science, mathematics; it's learning about our world and how aviation affects us all.

The FAA is vitally interested in the workforce of today, tomorrow, and all of our tomorrows. We care about the quality of those who work in aviation. We care about how the public is served.

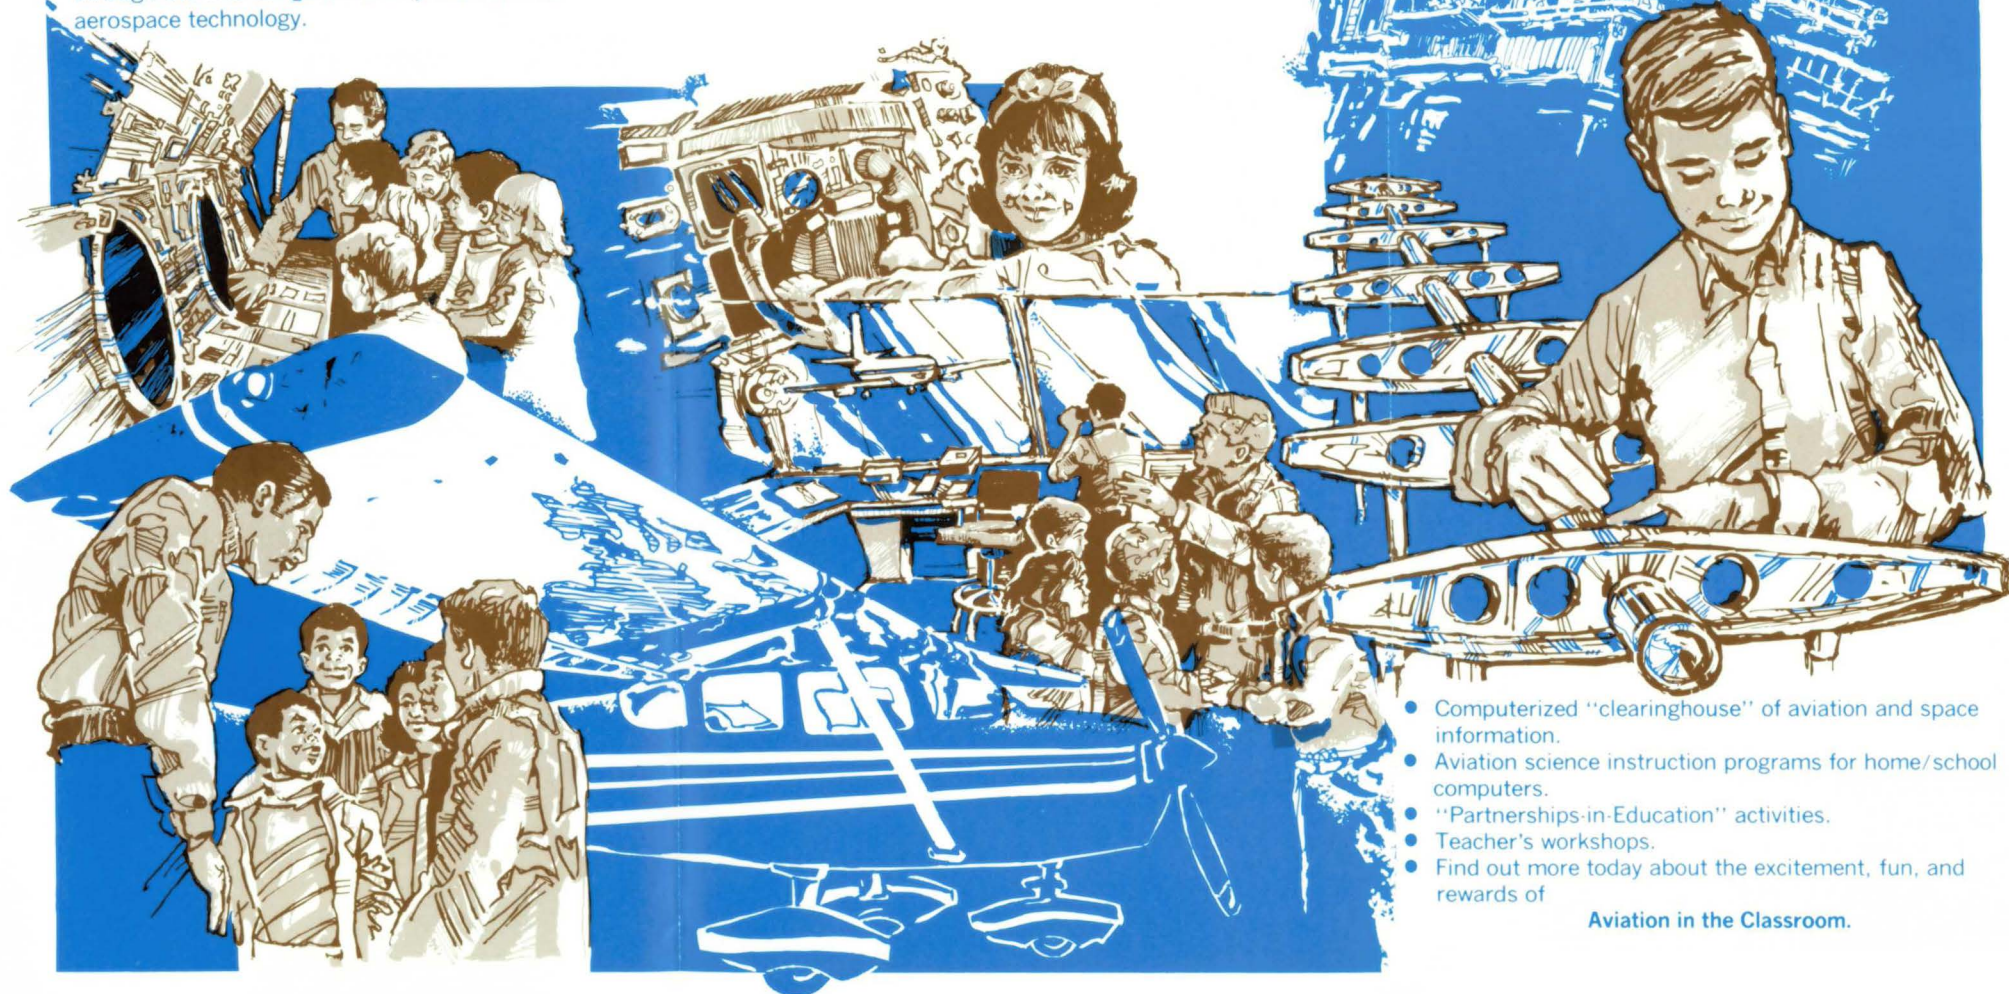

For these reasons, we are offering volunteer assistance to the nation's schools – let us tell you about..

- How your students can learn more about science, mathematics, history, social studies, and English – through the interest generated by aviation and aerospace technology.

- Exciting careers in aviation.
- Paths to careers through higher education.
- Projects that can enhance learning activities.

Our assistance is available in the form of:

- Career guidance – "Career Days" activities, "Shadowing," and other vocational information.
- Tours of airports, FAA air traffic control towers, flight service stations, airway facilities equipment, computer systems, and other selected sites.
- Classroom lectures and demonstrations.
- Aviation safety information.
- Aviation Education resource materials.

- Computerized "clearinghouse" of aviation and space information.
- Aviation science instruction programs for home/school computers.
- "Partnerships-in-Education" activities.
- Teacher's workshops.
- Find out more today about the excitement, fun, and rewards of

Aviation in the Classroom.
