Advance your deployment with the
Federal Highway Administration's

EQUIPMENT LOAN PROGRAM AND TECHNICAL SUPPORT

This service provides a connected and automated vehicle (CAV) user with the opportunity to become familiar with the types of equipment typically used in connected vehicle deployment. Equipment loans can include roadside units, onboard units, diagnostic tools, traffic signal controllers, and connected work zone equipment.

ADDITIONAL CAV SERVICES

- ISD message creator tool support.
- Dedicated short range communications (DSRC) and cellular vehicle-to-everything (C-V2X) configuration support.
- Device testing support.
- Vehicle-to-infrastructure (V2I) implementation support.
- CAV education (CAVe)-in-a-box technical assistance.
