Transit Bookshelf 2000

Federal Transit Administration

Transit Bookshelf 2000 is a compendium of selective readings taken from the bookshelf of the Federal Transit Administration (FTA). It is a reference tool designed to provide easy and rapid access to published material on transit planning, innovative research, safety and technology. The publication includes readings that support improvements in public transit today and in the future— advanced technologies, clean fuel technologies and environmentally-friendly vehicles, intelligent transportation systems, livable communities, new paradigms, safety and security, job access transport, and development of a diverse and highly-skilled transportation workforce.

The publications listed in this document are available to everyone at no charge. Each publication is listed under one of the six program areas of *FTA's Research & Technology 5-Year Plan* — a government-industry technology roadmap highlighting a more open and inclusive way we do business, achieve our goals. The six program areas are the following: Safety & Security, Equipment & Infrastructure, Fleet Operations, Specialized Customer Services, Policy & Planning, and Professional Capacity Building. Also included are documents under the following Implementation Methods; Joint Partnership Program for Deployment of Innovation, and International Mass Transportation Program.

Contact Information: To obtain a copy of any publication listed in this booklet, simply identify the title of the product and • **Email** your request to [research@fta.dot.gov], or • **Fax** your request to FTA at 202-366-3765, or • **Mail** your request to Federal Transit Administration, Office of Research, Demonstration and Innovation, 400 7th Street, SW, Room 9409, Washington, DC 20590.
