Consumer Guide to Uniform Tire Quality Grading

Comparative grade designations for treadwear, traction and temperature for all passenger car tires, except deep tread, winter-type snow tires; space-saver or temporary use spares; or tires with normal rim diameters of 12 inches or less.

This page intentionally left blank.

16. Abstract

All passenger vehicle tires must conform to Federal safety requirements in addition to certain grades for treadwear, traction, and temperature. This guide shows comparative grade designations for all passenger car tires, except deep tread, winter-type snow tires; space-saver or temporary use spares; or tires with normal rim diameters of 12 inches or less.

17. Key Words	18. Distribution Statement
Treadwear, Traction, Temperature Grades, Maximum Load Rating, Maximum Permissible Inflation Pressure, Tire Ply Composition, U.S. DOT Identification Number, Speed Symbol, Load Index, Rim Diameter Code, Construction Code, PSI	Document is available to the public from the DOT, BTS, National Transportation Library, Repository & Open Science Access Portal, https://rosap.ntl.bts.gov.

Consumer Guide to Uniform Tire Quality Grading

ALL PASSENGER CAR TIRES MUST CONFORM TO FEDERAL SAFETY REQUIREMENTS IN ADDITION TO THESE GRADES.

TREADWEAR: The treadwear grade is a comparative rating based on the wear rate of the tire when tested under controlled conditions on a specified government test course. A tire graded 150 would last one and a half (1 1/2) times the distance on the government test course under specified test conditions as one graded 100. The relative performance of tires depends upon the actual conditions of their use, however, and may depart significantly from the norm due to variations in driving habits, service practices and differences in road characteristics and climate.

TRACTION – AA, A, B and C: The traction grades from highest to lowest are AA, A, B and C and they represent the tire's ability to stop on wet pavement as measured under controlled conditions on specified government test surfaces of asphalt and concrete. A tire marked C may have poor traction performance.

WARNING:
The traction grade assigned to this tire is based on braking (straight ahead) traction tests and does not include cornering (turning) traction.

TEMPERATURE – A, B and C: The temperature grades are A (the highest), B and C, representing the tire's resistance to the generation of heat and its ability to dissipate heat when tested under controlled conditions on a specified indoor laboratory test wheel. Sustained high temperature can cause the material of the tire to degenerate and reduce tire life, and excessive temperature can lead to sudden tire failure. The grade C corresponds to a level of performance which all passenger car tires must meet under the Federal Motor Vehicle Safety Standard No. 109. Grades A and B represent higher levels of performance on the laboratory test wheel than the minimum required by law.

WARNING:
The temperature grade for this tire is established for a tire that is properly inflated and not overloaded. Excessive speed, under inflation, or excessive loading, either separately or in combination, can cause heat buildup and possible tire failure.

NOTE: This guide is based on the latest information available at press time. As more data are received, they will be posted at www.nhtsa.gov/vehicle-safety/tires

More information on the Uniform Tire Quality Grading System can also be found at the above website.

Underinflated Tires Can Lead to Disaster

Avoiding This Is Quick And Easy

FIND YOUR PSI.

Your PSI is the **p**ounds per **s**quare **i**nch of air pressure that's right for your tires. The correct PSI for your tires is located on your ***vehicle's*** tire information label – not on the sidewall of your tire.

CHECK IT MONTHLY.

At least once a month, check your vehicle's tire pressure using an accurate pressure gauge.

Bottom line: you cannot tell if your tires are underinflated just by looking.

U.S. Department of Transportation
National Highway Traffic Safety Administration

WHAT'S YOUR PSI?
